President orders government to resign in effort to stem rioting

Albania in state of emergency

By Kevin Done, East Europe Correspondent

The parliament in Albania, the poorest country in Europe, last night declared a national state of emergency in response to violent riots in several towns. As the country entered the worst crisis since its chaotic emergence from communism six years ago, President Sali Berisha warned that conditions had been created "to

engulf Albania in a civil war". He appeared on television last night to accuse foreign intelligence agencies and former Communists of fomenting unrest and to warn that he would use the "fron hand" of the law to end protests.

"Constitutional law and order has been violated and so have the institutions and the territorial integrity of Albania," he said.

On Saturday night, in an effort to restore calm. Presi dent Berisha ordered the resignation of his Democratic party government headed by Mr Aleksender Meksi, the primeminister.

It was the first concession to protesters following six weeks of civil turrest triggered by the collapse of e string of pyramid finance schemes. The collapse has cost many Albanians their life savings.

The resignation order failed to satisfy protesters and opposition forces, and violent riots continued yesterday in the south of the country.

Armed demonstrators threatened to march on the capital Tirana from the Adriatic port city of Vlore and other towns in sonthern Albania, unless President ground. Berisha agreed to dissolve parlisment and form an interim government of non-party technical and administrative - rather than a new Democratic party government as he had

Last night Mr Lamberto Dini, Italy's foreign minister, called for an urgent European Union ministerial meeting to discuss the state of emergency. Albania'e neighbours Italy

and Greece are becoming increasingly concerned about the risk of an exodus of illegal immigrants. Mr Dini said he also wanted international financial organisations and the US to take action.

"A financial rescue plan has to be drawn up as soon as possible, then political action is meeded." he said.

The downfall of the govern ment was precipitated by some IMF decided to send officials to of the worst scenes of violence the government of Albania by in the current crisis. Towns in

Ex-banker applies to run LA's troubled schools

By Christopher Parkes in Los Angeles

A leading Californian banker has challenged tradition with a bid to start a new career as manager-in-chief of one of the biggest and most politically ensitive education authorities in the US.

Mr William Siart, 50, ousted as chairman of First Interstate Bancorp after a hostile take-over last year by Wells Fargo, has applied for the \$160,000-ayear job of superintendent of the Los Augeles Unified

School District. Despite his lack of experi-ence in the field, he said the district's 1,000 schools, 60,000 employees, 700,000 young "customers" and \$5bn annual dget, presented e task tha was comparable in scale with

his former post. First Interstate had 1.300 branches, 40,000 employees and an annual operational

budget of \$3bn. Other similarities include high-security needs. But while banks deploy armed guards, electronic surveillance and coast opposite the Greek holisilent alarm systems, LA's educators have to make do police station, seized weapons,

with much less. Their crowded, dilapidated premises, where drugs and random violence are common-

EU to snub Albania leader fights to contain anarchy greenhouse gases plan

By Caroline Southey in Brussels

some gases by 10 per cent by European Union environ-2005 and by 15 per cent by ment ministers were last 2010. In eddition, it wants an night set to reject proposals for EU-wide cuts in greenhouse gas emissions, at an emergency meeting in Brus-

Failure to agree e common position on reducing emissions will scupper the EU's chances of tabling proposals at a key meeting of OECD environment officials on climate change in Bonn today.

A number of EU countries oppose plans under which the EU would cut greenhouse gases by 15 per cent by 2010. They are also deeply divided over a "burden sharing" proposal apportioning different levels of cuts to each member state, depending on levels of pollntion and on how energy is generated.

Ministers met in Brussels for an extraordinary meeting called by the Netherlands. which currently holds the presidency of the EU. It insisted on the 11tb-hour talks in an effort to thrash out e common EU position ahead of the Bonn meeting.

Pressure is mounting on the OECD countries to finalise the terms of e protocol for an international summit on climate change in Kyoto in December. The summit has been called to map out the next phase of cuts in greenhouse gases following the mandates agreed et the Rio and Berlin summits.

Despite wide opposition to the proposal, a Dutch official said the presidency was still hopeful the ministers would reech a deel when they

posed that the EU should cut

By Kevin Done,

Albania's beleaguered President Sali Berisha has made his first substantive concession to the forces of popular protest with the removal at the weekend of the government of the prime minister, Mr Aleksan-der Meksi. It is unlikely to be the last, however, as he battles to contain the rising wave of anarchy sweeping through some towns in southern Albania. The removal of the unpopular

overnment of Mr Meksi was e nod

to popular anger at the collapse of 8 per cent cut in carbon dioxthe pyramid investment schemes where many Albanians had ide emissions by 2005 and 12 per cent by 2010. "Member states think invested their savings. But it was these targets are too ambioffset by last night's hardline declaration of a state of emergency. tious and that as a result the EU risks being marginalised It is still far from clear, bowever, what forces Mr Berisha can call on in the Kyoto talks," said an EU diplomat. However, some to re-establish public order on the streets of cities such as Viore, countries, such as Germany which were abandoned to victoriand Denmark, do not think ous protesters by local police sev-

Opposition is even more eral weeks ago.

As part of the reforms adopted widespread to the "burden sharing" plan under which by Mr Berisha since his ruling the Dutch propose targets mocratic party ousted the communists in 1992, the army - built for each member stete. up during the 46 years of repres-These include a 40 per cent sion under the Stalinist regime of cut in emissions in Luxembourg, 30 per cent in Ger-Enver Hoxha and his successor many, 25 per cent in Austria and Denmark and 20 per Ramiz Alia - has been greatly reduced, damaging morale.

Outside the capital Tirana where hitherto the police, backed by large numbers of secret police and plain clothes officers, bas maintained e tight grip, the forces of public order have often been fighting e losing battle.

Local policemen, many of whom have been as much victims of the collapse of the fraudulent pyramid finance schemes as their fellow citoutnumbered riot police and agents gave more ground to the opposition of the secret police.

Protesters in southern Albania have been growing stronger since the first unrest erupted six weeks ago, and are frequently now armed They emerged victorious in Vlore at the weekend from a gunfight with officers of SHIK, the secret police, in which at least four people were killed and the SHIK headquarters was ransacked.

Mr Neritan Ceka, leader of the opposition Damocratic Alliance warned at the weekend that Mr Berisha risked civil war unless be

forces. However, after the chaotic events of the weekend, it is still unclear whather Albania's increas ingly authoritarian president is ready to vield.

Tha next test of Mr Berisha's intentions and his personal anthority within his own party comes today, if he decides to press ahead with the planned parliamentary vote that is supposed to return him

He has led Albania through a reckiess 12 months in which the

Since then the government has ruled with virtually no opposition from the Socialist party, the partly reformed former communists, which has boycotted parliament and refused to take up its seats. The fragmented opposition parties have sought to rally their forces in the new Fornm for formation of a "technical govern-

izens, have been reluctant to enter
Albanian immigrants short slogans against President Sali Berisha during a demonstration outside the confrontations, leaving the fight to

flawed general election last May to selves suffering from deep internal divisions, the opposition is yet to divisions, the opposition is yet to show that it can exploit popular

anger with the Berisha regi Western countries, whose financial support has been crucial to the maintenance of the regime, are still floundering in response to the crisis, although the US has been resolute ever since last year's alection in calling for round table talks which would bring the opposition forces back into the political arena.

Having reversed its former policy unwavering support for Mr Berisha in the wake of that poll, it is still calling for the drafting of a new constitution and the holding of fresh elections

The European Union has been much less decisive, with some northern states keen to exert pressure on Mr Berisha, while close neighbours such as Greece and of illegal Albanian immigrants, have insisted on a softer line.

While western countries pres for political reforms, the need for Mr Berisha to take action to halt the country's economic slide is also becoming urgent. The currency has weakened dangerously in recent days, prices are rising rapidly, and the budget deficit grew alarmingly last year to around 10 per cent of

gross domestic product. Before tha weekend's latest chaos the International Monetary Fund was expected to send e fresh mission to Albania during the next two weeks, ready to maist on tough reform conditions in exchange for a new economic support package.

The question now is whether there will be any sustainable government in Tirana for the IMF officials to talk to, as Mr Berisha. moves to tackle the most pressing need of restoring calm to the

The soccer world has been outraged by a proposal from Mr Tiziano Treu, employment minister, that footballers should no longer qualify for a pension at 45 but continue working until they are 60 like most Italians.

"A footballer is pensioned off at 45 but at 35 many are already out of work. retorted Mr Roberto Boninsegna, the former lnter Milan and Jnventus star, in an interview in the Turin newspaper La Stampa. And only e few, he added, become multi-millionaires who have accumulated enough money to go into early retirement.

Under an old rule, professlonel footballers could claim a monthly pension averaging around L1.8m (\$1,100). Now the government wants to reform the pension system for football and other professional sports such as cycling and basket-ball to ensure players' contributions match their pensions more equitably. One way of doing this is making them work longer and thus pay more contributions.

After a meeting in Rome at the employment ministry. the heads of fcotbell and sporting associations said they were well eware of the

The issue dates back to 1977, when Hungary and the former Czechoslovakia agreed to dam. the Danube to make it more navigable, prevent flooding

and generate electricity.

Construction of the Gabcikovo electricity plant in southern Slovakia began in the 1980s. In 1989 Hungary pulled out of the project before work on its electricity plant at Nagymaros began. Late in 1992, weeks before it split with the Czech Republic, Slovakia unilaterally diverted the river upstream from Hungary after the dam was completed. After appeals from the European Parliament and intervention by western governments both sides agreed to seek arbitration from th International Court of Justice in The Hague

Bratislava has retaliated by accusing Budapest of breaking a treaty by abandoning its part of the project. A ruling is expected in the autumn. Vincent Boland, Project

Offences hit Danes' ratings

The drink-driving records opposition Conservative party and of his succe bave boosted the poli ratings of the ruling Social Democratic party, which was languishing at 28.0 per cent last November, more than six polyie down from the 1994 election; Mr Hans Y Engell (left), the since 1998, resigned on February 21 following a irink driving offence. Or Saturday it was revested that his successor, Mr Per

to Opel.

Pressure on the country's public finances may soon hit Germans where it burts; in their cars. The federal transport ministry in Bonn has challenged the traditional free-dom of the autobahn by proposing that tolls should be used to finance 17 road projects in the next century. If approved by the Lander (states). motorists would for the first time

have to pay to use stretches of trunk routes and autobahns. However, in the face of stiff resistance to any additional motoring "taxes", charges would be restricted at least initially to particularly costly projects such

ing, particularly in eastern Germany, by the transport department, which has the largest investment budget of any federal ministry. Mr Matthias Wissmann, its minister, said transport had to make its contribution towards controlling federal finances, which are under pressure because of the Maastricht criteria on

economic and monetary union. But the 13.4m-member ADAC the German motorists' club - said it believed that "in principle all roadbuilding projects ought to be financed through receipts from taxes imposed on motorists - more than DM80bn [\$47bn] a year". It did not

might not otherwise go ahead and said the particular schemes proposed by the transport ministry would have to be scrutinised first.

that

The Bonn government is also trying to encourage private sector involvement in public sector projects as part of wider structural reform. and to boost the depressed German building Industry - although Mr Wissmann opposed "privatisation" of the autobahn network.

The tolls plan emerged after a meeting last week between the government and building industry, at which the government was urged to intervene to belp reviva the sector. The industry won some support for

age private sector projects by providing "seed-corn" financing for up to 20 per cent of traffic infrastructure

Last year, investment in the huilding industry fell - for the first time since reunification - by nearly 3 per cent, with western Germany worst affected. Mr Gunter Rexrodt, economics minister, described the situation in the construction industry as for unions and employers to improve competitiveness, "through appropriate wage agreements and further steps to cut the cost and increase the flexibility of labour".

Fundraising | US identifies its allies in drugs war probe more likely in US

in Washington

The campaign for a special prosecutor to investigate alleged fundraising abuses in the 1986 elections picked up momentum at the weekend, as the issue of the role of money in US politics continued to dominate the polit-

Several senior Republicans appeared on television political chat shows to call on Mrs Janet Reno, attorney general, to appoint an indepen-dent counsel to investigate Democratic party fundrais-

So far, specific allegations of violations have focused on officials too junior to be covered by the special counsel law. President Bill Clinton. and Vice President Al Gore - whose actions are covered by the law - are mostlyaccused of impropriety rather than illegality.

But politically, critical mass appears to be building behind the appointment of a prosecutor. Such a decision could prove difficult for Mrs Reno, who has been criticised in the past for being too Democratic National Comquick to appoint counsel.

Mr Dick Morris, one of the chief architects of the 1996 Clinton campaign, yesterday proving illegality, "It takes real talent to do something illegal under these laws," he told the Fox news channel. with so many loopholes, you row.

genius to be a criminal."

But the drive to change those laws in Congress, through reform of campaign finance legislation appears to be faltering. Democrats are insisting that Republicans make a firm promise to reform the lews before they will agree on funding for a sional investigation into pest abuses. Republicans are adamant that Congress must focus on past violations, not on reform.

Mr Trent Lott, Senate majority leader, promised yesterday that Congressional hearings on the 1996 campaign would definitely take place. "We're going to have these hearings. We don't have any choice," he said. But with the two sides continuing to squabble over the scope of the hearings, over their funding and over reform, this is still not cer-

Meanwhile, senior Democrats lashed out at the US media, which continues to shine a harsh spotlight on fundraising. Governor Roy Romer, chairman of the mittee, castigated the media for righteousness about cam-

The more than

the international drug war, the State Department report that often gets overlooked. Yet the International Narcotics Strategy Report contains the most detailed regular public analysis by the US administration of the international trade in illegal narcotics.

On Friday, the administration announced that Colombia, Nigeria, Afghanistan, Syria, Iran and Burma remained on its blacklist of states that had falled to co-operate fully with the US in the fight against drugs. Three others -Belize, Lebanon and Pakistan were deemed not to be co-operating fully, but economic sanctions against them were suspended on national interest grounds.

After an intensive discussion within the administration, Mexico was cited as an ally in good stand-ing, despite the arrest last month of Its top anti-drug official. Mr George Stephanopoulos, a former senior adviser to President Bill Clinton, said yesterday a biparti-

would lead to a battle in Congress. The State Department report said among the successes of US-led accompanies the announcement attempts to combat the drugs trade last year were interdiction efforts that forced traffickers to lengthen their supply lines to the US through the Eastern Caribbean. A so-called "air bridge" carrying

the bulk of Peruvian cocaine base to Colombia for processing and distribution had been broken.

This so depressed the price of coca leaf in Peru's Upper Huallaga valley - the world's most important growing area - that growers abandoned fields and contributed to a fall in coca cultivation by 18 per cent to the lowest levels in a decade. There was also a 12 per cent drop in Bolivia in potential coca leaf production, but this was offset by a 32 per cent increase in coca cultivation and potential leaf production in Colombia, in splte of aggressive aerial eradication.

Bad news, however, incloded the growing use of heroin in the US. Estimates of the US heroin eddict population, static at 500,000 for two

2m cocaine addicts in the US were increasingly using heroin to offset the effects of cocains, encouraged by high purity heroin from Colombla that can be snorted like cocaine. Europe, meanwhile, "has acquired a voracious appetite for cocaine and amphetamines".

"The lines between cocaine and heroin consuming countries are blurring. Cocaine and beroin trafficking, once limited to a few major routes and destinations in North America and Europe respectively, has become all but universal," It

oreover, new threats were emerging. Amphetamines – including methamphetamines such as Ecstasy -"are well on their way to becoming the drug control nightmare of the

Methamphetamines, hybrid cousins of the "Speed" of the 1960s, were displacing cocains as the stimulant of choice, and spreading too into dsveloping countries.

centres were spread as widely as Poland, Jepan and the Philippines. Some reports snggested some beroin refiners in Burma had

added methamphetamine to their product list. Meanwhile, Burmese production of heroin - 60 per cent of the world's total potential output of 430 tonnes - could alone probebly satisfy world demand. Mexico was the transhipment

point for about 80 per cent of the methamphetamine precursor chemicals going to the US: and between 50-60 per cent of US bound cocaine shipments.

Money laundering was also a grave problem in Mexico. "US officials consider Mexico the money laundering haven of choice for the initial placement of US currency in the world's financial system. Mexican officials acknowledge they have lost the first round against money launderers because the system is "permeated by suboroed officials," the report said. The war on money laundering was weakened by "endemic corruption".

The report also contains the

brother of Mr Carlos Salinas, for mer Mexican president.

The Swiss government blocked more than \$103m of suspected narcotics proceeds in 20 Swiss bank accounts belonging to Raul Salinas. These were "illegal assets hidden by the Raul Salinas cocaine trafficking organisation," the report said. Mr Salinas, awaiting trial in jail in Mexico, has said the funds derived from legitimate business dealings.

Daniel Dombey adds from Mexico City: The Mexican government yesterday announced it had obtained a warrant for the arrest of Mr Carlos Peralta, a leading businessmen, for tax fraud. Mr Peralta, until recently head of Grupo Iusacell, a telecommunications company, had earlier been caught up in the scandal surrounding Mr Raul Salinas, brother of former President Carlos Salinas, In 1996, Mr Peralta said he had lent \$50m for investment pur poses to the former President's brother, who has been held since 1995 on charges of corruption and most explicit official statement yet conspiracy to murder.

Out-gunned LA police show their quality under fire

By Christopher Parket

What a difference a day makes. On Thursday last week, the Los Angeles Police Department was in trouble again, under fire from media and rights groups after the shooting in error of a bystander who wandered within range of a special ser-

The force once hailed as "LA's finest", now more commonly mocked after events such as the videotaped beating of Mr Rodney King, and a flatfooted handling of the murders in the OJ Simpson case, often has such days.

Yet on Saturday, the North Hollywood police station was overflowing with ples and donuts - the force's staple fodder - plus thankdefiant official stance, under you notes and flowers. Cops forcements arrived, some last year, had died. At least which daily scan LA's pressure to be conciliatory. throughout the city were laden with heavier weaponry 17 police and bystanders had scrambled landscape for the

basking in glory. It started on Friday morning when two white bank robbers, black-clad and in body armour, strode slowly. out of a Hollywood bank and opened fire. A handful of police qualled

in a storm of high-velocity bullets from the bandits' AK-47 assault rifles, reloaded uncounted times from 100sbot magazines carried on ammunition belts. The return fire, from 9mm Berettas and police regulation reserves of 15 bullets a man, popped and flattened on the A policeman sat in a pud-

'em Up Gang, aka the AK-47 grievous excess," were acted Bandits, suspected of two in reality last Friday. As police and FBl rein similar successful bank raids Helicopter news cameras, been wounded.

TV news broadcasts later sealed the convergence of fact and fantasy. The most explicit clips and comments on the day's events were aired intercut with extracts from last year's hit gangster film Heat.

Despite critical acclaim for the performances of Al Pacino and Robert De Niro, many battle-bardened reviewers found the movies' bungled bank robbery and bullet-shredded denouement bard to take. Yet scenes described by reviewers as about the bravery and ingethe "midday gun battle that verges on parody," and "a minor war. . . through the streets of downtown Los

Two members of the Shoot Angeles...is the film's most

routine rough-and-tumble of freeway pile-ups, high-speed chases and house fires, had chanced on an event which reflected - for once with indisputable clarity - two central aspects of the city's travails with violent crime.

They chronicled the cold nonchalance, the immaculate logistics and the firepower which are the stock-in-trade of LA-region criminals who commit three bank robberies every day -20 per cent of the US total.

The images left no doubt nuity of the LAPD, only about the wisdom of sending them daily out-gunned into the line of fire.

Maradona has designs to theme himself

The international boom in theme restaurants has attracted its most controversial entrant in the figure of Diego Maradona.

The Argentine footballer. who damned the English with his "hand of God" before joining the pantheon of sporting giants, plans to develop an international chain of cafe/restaurants from Peking to Paris called "Maradona Cafe" themed on himself.

"It's an idea we're developing along the lines of Planet Hollywood. We bope to have it off the ground before the end of the year," Mr Maradona's lawyer, Mr Daniel Bolotnicof, said yes-

terday. are being kept secret by the Maradona camp. But the plan is for a first restaurant to be spened in the coming months in the fashionable Bnenos. Aires neighbourbood of Palermo, with other restaurants following in

China, Japan, Italy, France and Spain. Mr Maradona is collecting an assortment of shirts, tropbies, photographs and videos which be will "donate" to his eating vennes around the globe. Additional memorabilia will be solicited from some of the player's friends in the football world, Hristo Stoich-

kov, George Weah, and

his favourite politician, Fidel Castro.

The project is the latest and most ambitious off-field commercial venture by Mr Maradona, whose career bas personified the growth of football as big business.

During the 1980s, when Mr Maradona played his best football, millions of dollars generated by a combination of massive transfer fees, and merchandising and TV deals were channeled into off-sbore accounts in Liechtenstein.

Much of this was spent on a lavisb life style although the player seems to bave survived with sufficient disposable income to invest to a retirement policy.

Mr Maradona bopes bis celebrity status as one of the Precise investment plans world's greatest footballers will bring in millions of customers to his chain.

Friends and managers of Mr Maradona are thought to be keen to help him build a new future following a career which in recent years bas been badly undermined by the player's drug addic-

For the last two years Mr Maradona has been tied to a Incrative TV-backed contract with the Argentine team Boca Juniors. But last week transfer negotiations between Mr Maradona and Uruguayan football champions Penarol collapsed after the player had threatened to play for the club only when Gianluca Vialli, as well as he felt in the mood.

Arafat plea to Clinton over Jewish settlement

By Avi Machils in Jerusalem and Mark Huband in Cairo

Mr Yassir Arafat, the Palestinian Authority president, will today ask US President Bill Clinton to exert pressure on Mr Benjamin Netanyahu, the Israeli prime minister, over Israel's plans to build a new settlement in east Jerusalem.

Mr Arafat will appeal to Mr Clinton "to intervene personally to get Mr Netanyahu to revoke his decision", according to Mr Saeb Erekat, the chief Palestinian peace negotiator.

"We feel Clinton is the only one who can save the peace process from collapsing if bulldozers take to the land on Abu Ghneim," Mr Erekat said. He was referring to the Arabic name of

tion of the Har Homa settle-

During his US visit, Mr Arafat is also due to meet Mrs Madeleine Albright, US secretary of state, for the first time.

At the weekend, Mr Arafat told an emergency session of the Arab League in Cairo that Israel's decision would destroy the peace process. The Palestinian leader said he might unilaterally declare establishment of a Palestinian state in response.

Both Jerusalem's status and Palestinian statehood are on the agenda of final status peace talks scheduled for this month to address a list of disputed issues

In a strongly worded statement, the Arab League condemned Israel's plans to the hill upon which Israel asked the United Nations to Mr Netanyahn became prime last week approved construc- force Israel to reconsider. Mr minister last year.

Arafat will visit the UN ner international support. Palestinian leaders have

warned construction of Har Homa could spark renewed unrest. Bnt since Israel's decision last week. West Bank and Gaza streets have remained quiet as Palestinians await the outcome of Mr Arafat's US trip. Mr Moshe Fogel, an Israeli

government spokesman, said Israel did not intend to change Its mind. "Israel's policy on Jerusalem may not be easy for them to swallow...but in the final analysis we're going to have to act on our convictions," he said

Brazil plans industry fund after sell-off

By Gootf Dyer in São Paulo

The Brazilian government will use half the proceeds from the sale of the mining group Companhia Vale do Rio Doce (CVRD), expected to be Latin America's biggest privatisation so far, to set up a fund for investing in strategic industries. Analysis said the fund was an

attempt to appease the considerable political opposition to the sale of the government's 51 per cent stake in ('VRI), one of the world's biggest natural resources groups.

The finance ministry had been

pushing for the entire expected \$600.

debt. Some ministers had argued that the money from CVRD and other privatisations should be invested in domestic industry. The rules for the new fund have

yet to be decided, but Mr Antônio Kandir, planning minister, said investment would be directed at reducing Brazil's trade deficit, which reached a record \$5.54bn last year and is expected to grow again this year. "We need to create more competitive conditions for Brazilian products," he said.

Mr Luiz Carlos Mendonça de Barres, president of the National Development Bank (BNDES), which is

firmed that the government would maintain a five-year "golden share" in CVRD after the sale, which will allow it to veto change of owner-

The BNDES is due to publish on Wednesday the tender document and minimum price for the sale of a 40-45 per cent stake in CVRD to a consortium of industry buyers in an auction scheduled for April. The rest of the government's stake will then be sold to employees and in domestic and international share offerings.

always insisted the auction would go ahead, it has made a number of concessions to appease opposition. Last month it announced creation

of a joint venture between CVRD and the BNDES to develop potentially enormous gold and copper deposits in the northern state of Para, giving each party 50 per cent of eventual profits, after leaks about the deposits had threatened to delay the privatisation.

Some Brazilian politiclans fear that if CVRD is privatised, it will The sale of CVRD has become a cease to perform its social role in the key test of the Brazilian govern-Brazilian economy of opening up some of the country's underdevelment's commitment to privatisation,

The move disappointed foreign insurers camped in India awaiting a bigger opening. "It's an extremely tiny opportunity," said one insurance executive. "Very few foreign international players would look at health insurance in a poor country like India."

Mr Chidambaram's rivals will wait to see whether his budget revives the "animal INTERNATIONAL NEWS DIGEST

China reduces bank taxes

China has reduced taxes on state-owned banks and insurance companies to 33 per cent from 55 per cent to bring them into line with taxes for foreign financial institutions. Chinese banks and insurance companies win also now pay tax at the same rate as other Chinese funds enterprises, Mr Liu Zhongli, finance minister, told the annual parliamentary session.

Chinese banks had long complained they were at a

disadvantage in competition with foreign banks. Chira's decision to allow a select group of foreign banks to come in local currency business prompted the move Previously, foreign bunks were restricted to dealing in

foreign currency but now they will be permitted to compets on an experimental basis with domestic institutions. The trial programme will begin in Shanging. A western banker described the decision to lower the tax rate for domestic financial institutions as fair, and said it should further boost competition. China is sinder pressure from its trading partners to open further its services sector, a key element of negotiations on its entry to the World Trade Organisation. Tony Walkin, Bering

WTO progress for Taipei

Taiwan and its trading partners have reported good progress in talks on Taipei's entry to the World Trade Organisation. At a meeting on Friday of the WTO's membership working party, Mr Ke-Sheng Shou, Taiwan's vice-minister of economic affairs, said bliateral talks on market access for imports had been completed with elite countries, including Australia, Japan and South Rores. Talks with the US, EU and others are continuing.

The working party meeting was the first since December 1994, and no date has been set for the next. This leisurely timetable reflects the fact that under a 1909 accord in Gatt, the WTO's predecessor. Taiwan cannot join the WTO before China. Talks on China's 10-year-old bid for membership resumed last week in Geneva, amid. hopes that Beijing will come forward with new concessions. But even then most trade diplomats expect

negotiations to extend to the end of the year or beyond. Taiwan plans to introduce legislation this spring to ... make its trade laws compatible with WTO rules, and says it will join the WTO's government procurement accord and a planned deal to scrap tariffs on information ... Frances Williams, General technology products. New dawn in the east, Page 19

Six more join IT accord

The final obstacle to implementation of a global accord eliminating tariffs on information technology (IT) products was overcome at the weekend when Malaysia. Thailand and India said they would join the pact.

The three countries, all important IT exporters, bring the trade coverage of the Information Technology Agreement to over 90 per cent, the threshold stipulated for implementation when the pact was negotiated last.

The three were among six new members that submitted their detailed IT tariff schedules to the World Trade Organisation by the deadline of midnight on Saturday. The others are Israel, Romania and Estonia. The accord now has 87 participants, including the US, Japan and the 15 Buropean Union member states.

Members will meet later this month to bring the accord. into effect. The first tariff cuts are due in July this year. followed by three more in January each year to 2000, though some developing countries have been given longer for certain products. Frances Williams

Brussels fish talks urged

European Union ministers for overseas development want Brussels to initiate talks with Japan. Canada and other large fishing nations to ensure that agreements reached with developing nations granting them access to local waters do not impede economic progress or aggravate poverty. Meeting in Amsterdam at the weekend, they acknowledged that the EU's own fisheries agreements with third world countries often created that danger.

"There is obviously a big problem there," said Mr Jan Pronk, Dutch development co-operation minister, who chaired the informal session. Mrs Emma Bonino, fisheries commissioner, insisted that more recent bilateral accords were of a "second generation based on partnership" and normally prevented EU trawlers entering the 12 mile zone within which local vessels fished coastal waters. Some older pacts were being renegotiated.

Madrid last week blocked access by South Africa to the Lomé trade convention because it would not grant a . mainly Spanish EU deep-water fleet adequate rights to its

Banking on the environment Banks should develop a more harmonised and

transparent approach to assessing environmental credit. risks, and those which have not done so should adopt an environmental management system, according to a report published today. The recommendations by Green Alliance, a

London-based environmentalist organisation, are based

on a survey of 16 of the 90 signatories to a United Nations

statement committing banks to pay more attention to the environment. Banking on the Future says banks should collaborate to develop indicators of "good environmental performance" in areas of economic activity pursued by themselves and their clients. decades-old policy of giving ers were sent back into They will now be moved Burma but relief workers into camps away from the say boys as young as 10 fighting, according to Thai

The EU, the US and the United Nations High Commissioner for Refugees all expressed their "regret" at the repatriation, prompting Bangkok to backtrack at the

About 90,000 refugees from Burma, mostly ethnic Karens and Mons, remain in Thailand, relief workers say.

tory to burn down refugee camps they accuse of harbouring KNU rebels. Thailand has long used these camps as a buffer against the Burmese military. But Burmese officials have made it clear the camps must be eradicated as a prerequisite to improving

officials. Thailand's refugee

dilemma bas recently

become more acote as Bur-

mese forces made several

incursions into Thai terri-

and Bangkok. Nevertheless, a decision on how to administer refugee camps deeper inside Thailand has yet to be made. Thailand has been reinctant to invite the UNHCR into the country for fear of causing a mass exodus from Burma less than a month after the last of tens of thousands of Vietnamese refugees had been sent back

to Vietnam Nor has Thailand developed a coherent strategy for policing its side of the border. Previously, Thai officials have argued that, because the same ethnic gronps straddie both sides of the border, it is inevitable that the demarcation line should remain porous.

Thailand used to turn a blind eye to KNU activities along the border, but Bangkok has now changed its attitude towards the rebel group, which is fighting for greater autonomy for the eastern Karen state.

The Thai army at the weekend unearthed a cache of KNU weapons at the Thai-Burma border and confiscated them, officials said. The arms were believed to

bays been hidden by KNU guerrillas fleeing a Burmese army offensive earlier this

SE Asians to pursue plan for currency fund

South-east Asian finance ministers have asked the International Monetary Fund to present a formal proposal for a region-wide currency stabilisation fund. However, some countries in ming collective attacks on their currencies.

The request came after Mr Michel Camdessus, IMP managing director, told the inaugural meeting of finance ministers from the Associaished at the weekend, that they should collectively prepare themselves better both to monitor currency movements and defend those currencies in the event of an emergency.

A \$200m Asean Swap August this year, could form the backbone of a much larger currency protection scheme, Asean officials said. Mr Camdessus suggested that Asean consider a mechanism similar to the \$48hn New Arrangements to Borrow facility - to which 25 countries including Malay. sia, Singapore and Thailand have agreed to contribute approved by the IMF earlier

this year. As sonth-east Asian currencies gain favour among international investors taking advantage of high domestic interest rates, large and rapid capital inflows in the form of periodic speculative attacks have increas-

officials. With economic growth in some Asean countries slowing while their economies become more closely linked, some officials warn that a currency collapse in one country could affect the entire region.

So far Asean countries, the region are already along with other Asian expressing reservations neighbours such as Hong Kong and China, have spur action to deter speculative a web of bilateral repurchasing agreements, a move Mr Camdessus supported.

The Philippines, with a comparatively low level of international reserves, and Thailand, the current target tion of South-east Asian of currency worries, have Nations (Asean), which fin- access to \$3.5bn each from their Asian neighbours in the form of bilateral agreements and are seen as receptive to a more formal regional currency defence mechanism.

But other Asean countries, especially those that face Arrangement, set up in 1977 little danger of speculative and scheduled to expire in attack, appear more reluctant, particularly as Asean is expected soon to incorporate countries such as Burma and Cambodia where economies are fragile and currency regimes undeveloped. Mr Richard Hu Tsu Tau. Singapore finance minister, was quoted by AP-Dow Jones news agency as saving Asean's currency defences were adequate for now.

"The best defence against currency speculators is to have your fundamentals right," he said.

Asean finance ministers also signed a customs agreement which will harmonise customs procedures, product classification and tariff sment practices within

ingly concerned monetary Central Asian leaders in concerted attempt to lessen ecological damage

Aid pledged for shrinking Aral Sea Averting the catastrophe get before their neighbours

By Charles Clover in Almaty

Central Asian leaders gathered in Almaty, the cap-ital of Kazakhstan, last week in an effort to muster a concerted approach to the potential ecological disaster facing the Aral Sea.

The presidents of Kazakhstan, Uzbekistan, Turkmenistan, Tajikistan and Kyrgyzstan pledged aid totalling 0.3 per cent of their annual fiscal budgets to the International Fund for Saving the Aral Sea, set up in 1993 to aid the afflicted region. In addition, the World Bank announced it planned to provide a total of \$380m by the

Around 3.5m people live near the Aral Sea, which straddles the border between Kazakhstan and Uzbekistan The sea's volume has shrunk by three-quarters since the 1960s, when the government of the Soviet Union decided into the Aral is full of fertili from ansemia.

to increase cotton production in central Asia by diverting waters from the Syrdarya and the Amuderya, the two rivers which replenish it. Since then, the supply of water to the Aral Sea has cer and anaemia by as much fallen from 60 cubic km to 5 cubic km per year.

Setback for government in election run-up as minister contradicts official policy

Premier hit by Emu comment

The prime minieter's hopes of keeping his party united over European monetary union in the run-up to the general election received a shattering blow yesterday when one of his senior ministers said sterling would not be joining the new currency at the 1999 launch.

Mr Stephen Dorrell, chief health minister, said in a television interview: "We shan't be joining a single currency on January 1 1999." Although this is in tune with the private views of most cabinet mem- intended to question it," he said. bers, official government policy is that it is "very unlikely but not impossible" that sterling would join

bership in 1999. Recognising the explosive nature chancellor of the exchequer, to apologise. Mr Clarke is the government's stopped thinking properly". She staunchest champion of keeping added: "If the single currency hapstaunchest champion of keeping open the option of joining the cur rency. Soon afterwards, Mr Dorrell issued a retraction through Conservative Central Office, the party head-

Eurosceptic members of the governing Conservative party were delighted by Mr Dorrell's interven-

government position and no words I

used on the programme were

tility to the single currency, which is quite right," said Mr Bill Cash. Mrs Edwina Currie, the pro-Euroof his statement, he immediately pean former health minister, said telephoned Mr Kenneth Clarke, the she had "the feeling some of our cahinet ministers seem to have pens, and if it's well run, it's in

right from the start." Given the opportunity to withdraw quarters. "I entirely agree with the the remarks in the programme, Mr Dorrell first pointed to the difficulty of getting the necessary legislation through parliament on time and then said the prospect of joining was "vanishingly small"

Mr Dorrell's ambitions to succeed

party leader are likely to have been

It is the third time in recent weeks that he has appeared to depart from the official party line. Last month he indicated that a future Conservative government would abolish any new Scottish parliament created by the opposition Labour party if it wins the election. The official position is Britain's interests to he part of it that such new constitutional arrangements would be "difficult to unscramble". He then appeared to contradict the pessimism of Mr Michael Heseltine, the deputy prime minister, over the prospects of winning last week's Wirral Sonth hy-election by saying it was winnable. Labour took the safe Conservaat that date. It was the first time e tion. "This indicates a powerful hos- Mr John Major as Conservative tive seat with an 8,000 majority.

Greens focus on being realistic

By Liam Halligan in Scarborough

There were flowers, woolly jumpers and pierced noses aplenty. But at the Green party's spring conference, which ended yesterday. there were also genuine

The UK Greens are not as etrong as elsewhere in Europe, where they are present in 14 parliaments and three governments. The British party has never won a seat in the House of Commons and membership has dropped from 20,000 in 1989 to about 5,000.

But with a general election approaching, the party has begun to debate mainstream political issues. Ms Miriam Kennet, a member of the party executive, has en pushing the party "to think in terms which are both green and economically

Top of the bill was transport. Mr David Taylor, principal party speaker, called for more public transport, higher petrol taxes and targets for road traffic.

Chancellor to signal no change to rates

By Peter Marsh in London

Mr Kenneth Clarke, the chancellor of the exchequer, will today signal that bank base rates are almost certain to stay mchanged in the sensitive period ahead of the general election, expec-ted in May.

Pointing to benign inflationary pressures and the day for their monthly disstrength of the pound, Mr. cussion on interest rates.

Clarke will put the case for Economists believe there lack of inflationary pres-

in spite of calls in recent months from the Bank of England, the UK central bank, arguing for e monetary tightening to head off the risk of economic over-

heating. The chancellor is due to meet Mr Eddie George, the Bank governor, on Wednes-

leaving rates at 6 per cent, is virtually no chance that sures in the pipeline - from Mr George will persuade Mr Clarke of the necessity to

tighten policy. In a speech to the British Retail Consortium, the chancellor will sey today the economy is progressing et e "the etory is not 'hoom

producer prices that are et their lowest since the late 1960s, to moderate earnings growth and [pay] settlement

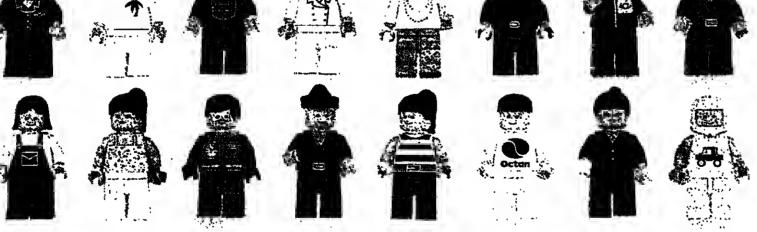

Also the recent strength of the pound and its effects on motivation prior to the satisfactory rate, but that making UK goods less competitive in other countries is imposing a brake on the economy - another reason sured by the exceptional for inflationary pressures tary policy is purely ecobeing muted.

talk of dieegreements between him and Mr George over interest rates has been exaggerated. In an effort to eliminate

speculation that his main election is not to npset voters with a rise in loan costs, Mr Clarke will argue that his rationale on mone-

SPOT THE REFUGEE

There he is. Fourth row, second from the left. The one with the moustache. Obvious really.

Maybe not. The unsavoury-looking character you're looking at is more likely to be your average neighbourhood slob with a grubby vest and a weekend's stubble on his chin.

And the real refugee could just as easily be the clean-cut fellow on his left. You see, refugees are just like you

and me. Except for one thing.

Everything they once had has been left behind. Home, family, possessions, all gone. They have nothing.

And nothing is all they'll ever have unless we all extend a helping hand.

We know you can't give them back the things that others have taken away.

United Nations High Commissioner for Refugees

We're not even asking for money (though every cent certainly helps). But we are asking that you keep an

open mind. And a smile of welcome. It may not seem much. But to a refugee it can mean everything.

UNHCR is a strictly humanitarian organization funded only by voluntary contributions. Currently it is responsible for more than 19 million refugees around the world.

Merrill chooses City for HQ

Merrill Lynch, the biggest US brokerage house, appears set to spend more than £200m (\$324m) on building a new headquarters building in the City of London, rather than move to the Docklands district to the east. The company insisted yesterday that it bad still not made a final decision, but it is believed that it will opt to move from Ropemaker Place to the site of the former Post Office headquarters in King Edward Street in the City.

"No decision has been made and we continue to explore all our options," said the company. Merrill is also thought to have been considering sites in the capital's former Docklands, including at the big Canary Wharf complex which was rescued from administrative receivership last year. Office rents recently have been rising in Docklands, where an extension to the Underground railway is due to open next year. The line will radically improve communi-cations to Docklands and has encouraged several high profile lettings at Canary Wharf, including a decision by. Citibank to consolidate its operations in a 50,400 sq m building. Other recently announced moves to Canary Wharf include BZW taking 62,550 sq.m to house its 4,000 Christopher Adoms

E CENTRAL BANK

New money market system begins

The Bank of England, the UK's central bank; today begins its new operations in the way it intervenes in the UK's money markets to set interest rates and to supply liquidity to the clearing banks. The new system - the biggest change to the Bank's money markets operations for more than 100 years - severs the Bank's exclusive link with the City of Loudon'e discount houses.

It will broaden the range of parties with which the Bank trades debt to include banks and securities firms and will widen the type of eligible debt instruments. The aim is to make UK money markets less volatile and more attractive and allow interest rate changes to be transmitted more effectively across the economy.

The Bank's move also brings the UK into line with other EU countries such as Germany. Interest rate setting for the single European currency would almost certainly be based on the new system.

CITY CENTRES

EU urged to aid Coventry project

The European Union is being urged to finance an experiment on using the private sector to maintain diritain's city centres. A pilot project in Covenity, in the linglish Midlands, could bring closer the prospect of US style Business improvement Districts (Bids) — where compulsory levies on property owners are used to supplement public

An EU decision on an application by Coventry's munic pal enthority for Ecusim (\$6.8m) over three years to fund the experiment is likely at the end of this month. The Cor-poration of Lundon, the municipal authority for the City. is urging the government to allow experiments with USstyle Bids in the UK.

FEMALE MANAGERS

'Old boys' network still a barrier

The "old boys network" remains the singlebarrier for female managers, even though its influence of them is diminishing, according to a wide-ranging survey of management attitudes published today. The right

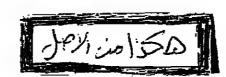

of management attitudes published today. The right school fie, university or club still seem to play their part in the male managerial world, while the glass colling has not yet been shattered for women, "says the scady, cone, missioned by the Institute of Management.

The most common obstacle faced by the women who cook part in the study of 1,800 managers was the existence of informal male clubs, followed by the preparate of colleagues". The study suggests that attitudes have shifted significantly since 1992 when a similar sufference when were not readily acknowledged to be equal partners in the workplace". The proportion of women who cited the "old boys network" as a problem has fallen by 5. cited the "old boys network" as a problem has fallen by 5 percentage points to 38 per cent.

hnt the seller is taking an open-ended bet.

Setting a price that will cover the risk involved requires a complex formula based, in its simplest form. on five elements. The first two of these - the time until the option matures and the strike, or price at which the option can be exercised - are set out in the contract. Two other elements - the price of the underlying asset and the annual interest rate - can be the market.

The fifth element, however, is the volatility . of the asset, and that can only be estimated. *Options are tricky. It is a three-dimensional problem to get it right," commented a trader at one rival bank.

With more complex derivatogether, estimating volatility can be more difficult.

Most banks trading interest rate caps price them using a volatility curve, with lambro Magan, in New option, the risk is limited, a higher rate of volatility

applied at the beginning of

the contract. Banks which traded with NatWest said it priced interest rate caps using a single averaga rate of volatility across the lifetime of the cap. That tended to result in its overpricing contracts where the strike price was set high, and to undervalue contracts where it was set low. Many banks admit that their senior managers have great difficulty understandfairly easily determined from ing the science involved in

volatility. "Delta [the rate at which an option's price changes in relation to the price of its underlying asset] is bad enough, but when you add in gamma [the rate at which the delta changes in relation with so many parameters to the price of the asset] it that it is sometimes difficult turns into ancient Greek for some of our older members," said one banker.

When the consequences of tives such as interest rate not understanding can turn caps, and floors, which out to be a £50m hole in a hebave in some ways like a bank's books, the incentive series of options strung to learn Greek becomes considerable.

Bonn provides no grand stage on which political egos are indulged. Walk a little way from the parliamentary building and you are among suburban houses. The foreign ministry could be mistaken for a large school, if there was not a nearby underground station that took its name. There are frequent police convoys escorting federal ministers and foreign visitors.

But traffic is as likely to be delayed by a farm tractor, recalcitrant toddler or slow-moving digger. "There is no power politics, it's not aggressive towards neighbours," says Mayor Dieckmann.

A desire by that country's poli-

cratic German government, but of "Bonn politics" explains why. "Bonn politics" has encouraged after the transfer to Berlin, the consensus and the pooling of city will become Germany's "federal city". This is no sop. As the date of the move epproaches, efforts ara intansifying to enshrine Bonn as Germany's sec-

ond political centre. A number of ministries will remain in thare, including defenca, anvironment, health, agriculture and the ministry for economic co-operation and devel-

fair chunk of the diplomatic community will also stay, and not just agricultural or defence attachés. Many third-world counremain close to the development ministry, which is an important source of financial aid. Other ministries will keep the largest

15.000. Nevertheless, Bonn's Social Democratic/Green coalition government is anxious to find new roles for the city, conscious perhaps of becoming merely Berlin's back office. The aim is to become a futuristic international, media and science city. A DM2.8bn (£1.02bn) compensation budget, funded by the federal and state governments, will help, among other projects, with a planned high-speed rail link to the airport

Bonn shares with Cologne. Ambitions have had to be scaled back a little. Bonn has cannot yet be failed to persuade any great history books.

world organisation to move there although the United Nations Volunteers programme has come from Geneva - but the headquarters of Dautsche Telekom, Europe's biggest telecommunications company, is on its doorstep with the prospect of spawning other media companies.

Already, buildings are being reallocated; the ministry for economic co-operation and development is moving into the chancellor's department and federal auditors will have the run of the foreign ministry. The Bundestag building will become a muchneeded conference venue. Per-haps the villas of Bad Godesberg will be home to cyberspace exec-

utives. To outsiders it all seems fanciful. Without the politicians, journalists and many of the diplomats, Bonn may lose its soul. The small-town feel might become inescapable. But preparations for 1999 are being carried out with a thoroughness that suggests Bonn cannot yet be consigned to the

The Monday Profile: Jürgen Dormann, Hoechst

The right chemistry

t is a Wednesday morning, and a lone figure walks the hills above Frankfurt, plotting evolution. Jürgen Dormann, chairman of Hoechst. Europe's largest drugs and chemlcals company, is in the process of dismantling his empire: a process that requires a formidable imagination.

"He has opened the door for the rest of the chemicals industry with the ingenuity of his solntions," says one Londoo-based chemicals analyst. But then brokers' analysts tend to be Dormann fans. His competitors are less eothusiastic, reflecting the fundamental nature of the problem Dormann is addressing.

Chemical companies have grown op as conglomerates, fuelled by a flow of inventions from their science laboratories that has been dictated by the inventive muse rather than commercial logic. Each product served different markets, be it farmers, doctors or manufacturers. As a result, management issues conflicted and information needs were rarely complementary. This disparity only got worse as some products matured into ex-patent commodities whila others were replaced by next-generation high technology.

Dormann is now unbundling these unrelated businesses. This amounts to more than a complex carve-up: he is turning the culture of the chemical industry on its head.

During the next few months, Hoechst will complete its division into more than 13 separate companies. A strategic management outright, and a stake in the remainder. Some or all of these companies will be launched on the stock market. Dormann is clear. "This is just the first step."

He is confident he has found a way of dividing Hoechst without incurring the huge tax bill that German law would normally impose on such a break-up. Step two is about a year away, he says. He will not reveal

But as the chemicals industry with BASF, and polypropylene waits in suspense, the initially large camp of Dormann sceptics - inclined to dismiss him as a big will relinquish control of its least talker, and a deft manager of profitable business - speciality Immediately after his appointment as chairman, three years ago. Dormann replaced the company's German board with an international one encompassing American, Brazilian and French directors. He also started cutting

costs, brutally. Next, the group's difficult businesses were shared with other companies. Textiles dyes went into a joint venture with Bayer; the bulk plastic polyethylene

of custom and practice. It has linked executive salaries to its share price and become acutely dedicated to managing that price upwards. The oext move will be its own New York

the French drugs company; and so on. And at every turn it is playing outside the German code

listing, which will raise no new capital hnt will maka Hoechst shares "more available", says Dormann. The chairman is an arts and

social sciences man, Indeed, his early years of adulthood featured a protracted period as an undergraduate, studying history, music and obscure literary courses, until his family started to grow. Then a dash through ecocomics clinched his degree and landed him a job with Hoechst that saw him through the raising of four

The company has always played second fiddle to his family, he claims. This is not to say he does not love his job. But he has never been "willing to be

eaten up by the company". However, far from lessening his dedication to resolving Hoechst's problems, this attitude seems to have made him more intolerant of the group's inherent

Slight and physically unprepossessing, he seems far younger than 57, but his piercing gaze reinforces his image as an intimidating intellectual. He had worked out what needed to be done at Hoechst years before his elevation to the post of chairman, he says, which was immensely

Bar-talk within the chemicals industry has It that Dormann is focusing on Hoechst' share price as a precursor to his main ambition: chairmanship of a German bank. He laughs. And indeed it is possible that when he has reshaped Hoechst, he will retire into obscurity. But he is still setting aside half a day a week to walk those hills - and think.

on the economy. Indeed, large

chunks of industry were in the

public sector. Roughly 30 per

spent on them in 1979.

FT GUIDE TO:

CLONING

Why has Dolly the sheep caused such a fuss? Because she is the first mammal to have been clooed from an adult cell. Until Ian Wilmut and colleagues at the Roslin Institute, Edinburgh, announced their breakthrough in last week's Nature, scientists had only succeeded in creating

clooes from embryos. nost of the worldwide uproar about their work has been triggered by fear that others will use a similar technique to clone buman beings.

How easy would it be to create a clone from an adult human?

No one knows. Until last week, most scientists believed it would be impossible to clone any sort of adult mammal, because the DNA that carries its genetic blueprint cannot guide the development of an embryo more than once. The existence of Dolly proves them wrong and shows that in

principle human cloning is possible.

But many experts believe there are huge technical obstacles in the way of applying the technique

to people. For example, cells begin to develop specialised functions more quickly in a new human embryo than in a sheep - giving the adult DNA less time to take charge of the development process.

What's so frightening about clones anyway? Nothing. Identical twins are clones, resulting

from the natural division of newly fertilised eggs. Of course, a child cloned artificially from an adult would be very similar to the original, sharing the same DNA, but - disregarding the obvious age difference - they would be less identical than a

Remember that genes truly determine part of your identity. The rest comes from the environ-ment. A shared womb gives identical twins a similarity that could never be achieved with different-generation clones.

Are you suggesting that all the fear and loathing triggered by Dolly is misplaced?

Some of it is. The news has re-awakened science fiction horrors from earlier this century, of cloned Hitlers and armies of cloned slaves serving evil

In fact, the technique is unlikely to be suitable for mass cloning, because it is extremely inefficient. The Roslin team had to carry out almost 300 fusions of mature DNA from udder cells with unfertilised sheep's eggs to obtain one cloned

But she's just the start. Won't scientists improve the success rate quickly now that they know the cioning works?

No doubt it will improve but there are technical reasons why it is likely always to be low. After all, conventional in-vitro fertilisation with normal

sperm and eggs has less than a 20 per cent success rate after 20 years of clinical development. The words "cloning from adults" somehow suggest a short-cut in the production process, but It will always require a full nine-month pregnancy to deliver a cloned baby.

They are concentrating on animal breeding, but . Even if you dismiss sci-fi horror scenarios, the idea of vain, rich individuals trying to clone themselves remains repellent.

Yes, it would certainly be against the "natural order of things". And in the UK, at least, it would

be Illegal. A more practical objection is that someone created by cloning might be at greater risk of developing disease. Although Dolly seems healthy so far, she is still young. Biologists fear that a human created from adult DNA .- which would inevitably have been damaged to some extent over the donor's lifetime – might age more rap-idly or suffer more degenerative disease than normal. It would certainly be unethical to clone a

Can you see a time when human cloning is ethically acceptable?

human being under those circomstances.

Attitudes to new biological technologies do change over time. Remember the outrage surrounding the first heart transplants in the 1960s and the first test-tube babies in the 1970s. Now transplants and in-vitro fertilisation are

Human cloning is unlikely to be accepted so quickly, because the opposition is stronger and the medical uncertainties greater. But if scientists can prove that the technique is safe for the cloned baby, it might eventually be regarded as a reasonable last resort for people who cannot have children any other way. Biotechnology offers more frightening possibilities than cloning.

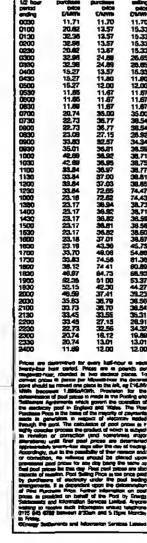

OK, territy us then.
Cloning # a typervative lecimology; it tries to recreate what already exists. In contrast, genetic engineering gives combinations of genes that

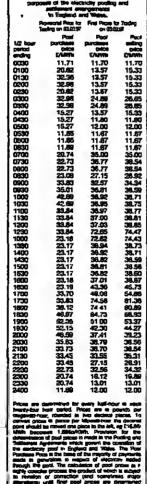

never existed in pature.

Scientists have been injecting foreign genes into animal embryos for more than 10 years, creating more destrable for agriculture or medicine (as living factories to produce human drugs).

No one has admitted carrying out such an experiment on human embryos but it would technically be fessible today. In 20 or 30 years, when the genetic combinations that tend to make people more intelligent or athletic or attractive are known, the prospect of adding those qualities to future generations may seem irresistible. The fuss about cloning will then look like a minor

Clive Cookson

chunk of public speoding is not its size, but the way it is spent. This sounds obvious. But it is striking how few of the proponents of smaller government bother to explain why they believe a large state is so harmful. The empirical evideoce, certainly, is unpersuasive. As Richard Layard, et the Loodon School of Economics, shows in a recent book, among Organisation for Ecocomic Co-operation and Development countries there is no obvious correlatioo between comic growth. More sophisticated attempts to get at this beautiful" claim ought to come

Stephanie Flanders · Economics Notebook

Rethinking the state

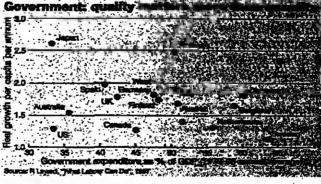

Advocates of the smaller state should think before they shrink

Government: quality matters results. The lack of an obvious connectioo does not mean the downsizers are wrong, but it does show that the "headline size of government is not tha In 1979 real geoeral governmeot spending in the UK accounted for 42% per cent of GDP, almost exactly the same as in 1995-96. But clearly the state then had a very different impact

cent of the employed workforce was working for either central or with two important caveats. local government or for a state-First, just as the way governments spend their money matowned corporation, compared to about 16 per cent today. Even in those sectors which ters, so does the way they raise revenue. In 1975, the combined have remained largely under revenues of personal income tax state control, the government and value-sdded tax came to presumably believes that Conserabout 18 per cent of GDP, only slightly more than last year's vative reforms have made them total But VAT has shot up in more competitive. And collecting taxes market-frieodly, by eliminating always carries a "deadweight the previous "penal" marginal tax rates oo high earners.

cost" for output and efficiency by distorting people's behaviour. Tha second, more important, Ergo, countries with small govcaveat is a reminder that governernmeots will still do better than ments have rarely been in the those where the state is large. business of "taxing for tax's Yet here, too, the "small is sake". By and large, the goods which the state now provides are

goods which people want. Satisfying that demand, in turn, brings economic benefits. This is widely accepted when it comes to health and education. The debate about these sectors tends to revolve around how much health and education the state should pay for, not whether It should do so at all. But many other parts of the welfare state

can also be defended on grounds Ecocomists would tend to of economic efficiency, not just . unfashionable desire for social justice.
As Hans-Werner Sinn, an economist at the University of

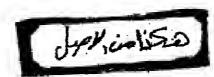

Munich, argued in a recent article, both the welfare state and the redistributive taxation system needed to pay for it are good for the economy to the extent that they encourage people to undertake risky but profitable activities. The welfare state, on this view, is an insurance device. By reducing the variability of lifetime incomes, it insures people against the randomness in career opportunities

and in the natural lottery of

effective a private insurance system would have to sign everyone up to a life-long commitment to the insurer from birth. "It would approximate bondage, a system long overcome by the course of history." Of course, the welfare state has drawbacks. Protecting people from dramatic swings in ncome can meet efficiency, by encouraging them to take many career risks; indeed, to drop out of working.

trade offs. Somewhere along the continuum between a Stalinist welfare system and Hobber Leviathan will be a government which helps the economy more than it hinders is. But measuring the size of the UK state tells very little about where the country stands on this continuence or even the direction in which we should be heading. A very chean, but poorty

designed, welfare system might have far worse disincentiva effects than a more costly version. And one fil-considered res ulation can cost the country far more in lost growth and efficiency then many of the public expenditure programmes listed in the Budget Focusing on the size of the state rather than the underlying substance makes for better headlines. But it is a po place to start in the se

In 1996, EG invested over US\$9 billion to grow its business.

It's nice to meet you.

A miracle is happening in Prahova Province, Romania.

Villagers who once waited years for telephone service are now connected by digital switches and fiber-optic cable to anywhere in the world, part of a US\$75 million project between LG Information & Communications and RomTelecom.

We're active in many other businesses too, like multimedia processors, industrial and information systems, securities underwriting, and genetic engineering.

But nothing gives our 126,000 employees more pleasure than knowing that we help people become connected to a larger world of opportunity. Now, how can we help you?

Old school tie loosens

Attitudes towards women managers are improving, writes Vanessa Houlder

or Gail Green, a sales operation manager, there were few surprises in today'a report by the Institute of Management, which highlights the influence of the "old boys" network" on the careers of

women managers in the UK.*
When she worked in the construction industry, she was often made to feel intimidated at meetings where she was invariably the only woman. At breaks, ber colleagues would ignore her and get in a huddle to talk about golf. The prejudice and chauvinism

were horrifying," abe says. But it does not have to be like that. She has found that the culture of her current employer -Stena Lines, the Swedish travel company - presents no barriers to women's advancement. Except for a handful of male-dominated industriee, life is generally getting easier for female

managers, she thinks. "Some areas of working life have come a long way," she says. Things are so much hetter now than when I first started work. There are so many more opportu-

Karen Charlesworth, author of the Institute of Management study, also believes that attitudes

are changing for the better. She was encouraged by the decline in women citing the "old boys' network" as a barrier, from 43 per cent in 1992 to 38 per cent. The proportion citing "prejudice of colleagues" as an issue fell

from 35 per cent to 31 per cent. Charlesworth points out that 23 per cent of men - and an even higher proportion of younger men - also see the "old boys' network" as a career barrier. "I get the feeling that age and seniority has as much of a part to play as gender," she says.

She suggests that one reason why women are less troubled by these constraints is that they

ire them all: the whole

training department needs to be made

have discovered the importance of networking for themselves. "They are beginning to appreci ate there are more informal factors that play a role in success,"

she says. Jane Parry, a small business manager at Barclays Bank who has eet up Enterprising Women. a networking group for businesswomen, agrees. She thinks that women have, in the past, failed to see the value of devoting time to networking, given the other pressures on their time. But there is a growing realisation of its importance, she says.

Another encouraging sign of change, according to Charlesworth, was the relatively low profile of childcare issues in the survey. "Childcare issues, to an extent, have been tackled. It doesn't impinge on their [women'al working lives."

Not everyone agrees, however. The view of Opportunity 2000, the campaign to increase women's employment opportunities, is that although many leading-edge apanies have introduced "family-friendly" initiatives, the majority of employers have not tackled these issues at all.

Moreover, the composition of the survey itself suggests that men's careers are affected hy having a family. Only 21 per cent of the women managers surveyed had children under 16, compared with 43 per cent of men.

Gail Green thinks many women still have to make a choice between family and careers. "Men don't have that dilemma," she says. "They are not the main carers. It is still the women who have to make the sacrifice. That is why a lot of women like myself in high powered jobs choose not to have a

numbers of men and women. It still has a large number of eenior women managers however, which it partly ascribes to flexible working and its belief

that working part time should not damage promotion prospects. For Hilary Cropper, chief execntive, one of the crucial findings of the study was that there were very few perceived differences in the behaviour of male and female managers. This tallies with Fra experience, she says. We felt for a long time there were no appreclable differences in the way that men and women went about their

Cropper was also unsurprised by the huge gap that emerged between the attitudes of employees and their perception of their organisations. The majority of respondents described their own style as participative, hut only 15 per cent of respondents said the same of their company culture. That accorded with her own experience in a previous joh. "At the more senior levels I found that the organisation expected me to behave much more politically than I would have liked."

she says.
But she draws encouragement from the findings that authoritarian styles were most prevalent among more senior, older managers. Attitudes may change as younger managers become more influential, she thinks.

Charlesworth also thinks that attitudes are changing. Her study ehowed that at the beginning of their managerial careers, 13 per cent of women claimed not to have encountered any barriers so far, compared with 8 per cent of junior male managers.

They expect to he seen as equal, says Charlesworth. "These young women take for granted their right to progress and compete with men, benefiting perhaps from the efforts of those women who have smoothed their way before.

Give trainers the sack

The ideal is to have a portfolio of external trainers whose individual expertise enriches a company

audited and monitored outside specialists.

So what are the arguments against in-house trainers? First, in order to get cost effective use out of trainers, they probably need to be "in the classroom" about 70 per cent of the time. That is a lot of training time - perhaps too much for the and certa much for the trainer. Optimal utilisation of the training department is very difficult to achieve. Long summer holidays and peaks in the business cycle mean little training. Fallow training periods waste money. Equally, in husy times the staff may not be able to cope. Trainers burn out easily.

Training is exhausting, as any good trainer will tell you. They need to be entertainers, monitors, enthusiasts and educationalists at the same time. They have to coerce the unwilling, amuse the sense-of-humour failures and render the charisma-by-pass manager charming. They have to pass on skills and knowledge but "attitude". To do all this takes its toll. Used too often even the best trainer can become tired, flat and boring. The working life expectancy of full-time trainers is rather sbort.

 Trainers are notoriously difficult to manage. This is partly due to the sort of people that drift into training. Am-dram

We are

used to

satisfying

enthusiasts, intellectuals manqué and failed preachers all get attracted to training. They can be egotistical and are rarely team players. Many get very enthusiastic about newlangled ideas and fads in training. Attracted by bizarre and long-discredited ideas, trainers can often be heard espousing do not, perhaps cannot, keep up to date with the literature. Most trainers are not interested in, and do not understand, business issues. Yet employee training must be integrated with the business plan. It has to be responsive to current organisational issues. Training must be flexible and

dynamic. Yet courses tend to have a life of their own, often being repeated because of the peculiar enthusiasm of particular individuals.

 Finally, over time, many trainers become organo-centric. While it may be a huge advantage that they bave a full understanding and knowledge of their particular organisation, they tend to know less and less about others. Despite talk of benchmarking, best practice and so on, they take their eye off others and become obsessed by internal issues and politics. Outsiders, by contrast, bring a wealth of comparative

The implied solution is to buy ers from the of ideal is to have a portfolio of tried and trusted trainers whose individual expertise and outside experiences enrich the company. "Hired when required; fired when tired" is the optimal solution.

Sex, lies and a female way with autocracy

ales and females behave differently. Watch them in the school playground and in the office canteen. Just listen to them chatting on the hus and at cocktail parties. The popular view is that men and women managers behave differently too. There is supposed to be a distinctive female management style that is softer, more democratic. Women bosses are said to be more emotional, more caring, more riskaverse, less aggressive, more compassionate, hetter listeners and

natural mentors. Yet the facts simply do not bear this out. Men and women may be different, but managers are all the same. Research from the Institute of Management published today (above) suggests that the manage-ment styles of the sexes are almost identical. Both emerge as participative and democratic; neither sex comes out as in the least euthoritarian or aggressive.

This is not so strange when you consider that the survey was based on a questionnaire that managers had to fill in about themselves. It is safe to conclude, therefore, that the sexes are equal in their ability to lie. Managers are meant to be team players and coaches, so it is not surprising if they chose to describe them-selves in those terms.

More damaging to the conventional "soft" view of women man-agers is research from Manchester Business School. This suggests that if anything women entrepreneurs are more autocratic than men.

Still, surveys can prove whatever you want them to. The evidence I find more convincing comes from real life. If you think about the women you know in authority, it is hard to find much evidence of these famous softer skills. Most of the female bosses I know are just as aggressive and euthoritarian as their male counterparts. (Admittedly our

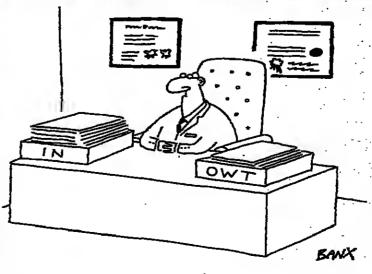

Lucy Kellaway

brand new chief executive of Pearson, shows some softness in addressing her office memos to "Dear everybody" - but it is early days.)

Maybe the reason men and women at the top both tend to be antocratic is that women are trying to beat men at their own power-crazed game. But I think that is a simplification. The problem is when we go looking for difference between male and female managers we are looking for the wrong things. Women are just as autocratic as men, while men are just as good at listening as women. The difference is that what

very own Marjorie Scardino, the women hear when they listen is different, and their variety of autocracy is different too. It is not softer, or more caring. It is just, well, female.

> First came "personal reasons" as the explanation given by companies for endden departures of their top people. Then came "differences in management style". Now we have "irreconcilable differences in management style" as the stock phrase to explain the inexplicable. This newest fashion - seen last week by. Pace Micro Technology - represents

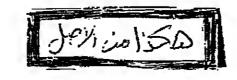

an advance in that it leaves us in no doubt that something pretty nasty has happened. But it does not actually help us in understanding what the nastiness was all about it is most improbable that anyone could actually resign suddenly over a dif-ference in style – especially in the case of Pace. After all, the joint chief executives have had years to get the drift of each other's style.

One assumes that when companies wheel out this explanation either something shameful has gone on er there has been a huge bust up leav-ing a good deal of personal haired in its wake. Corporate openness only goes so far. It will be a long time before we see the phrase "hate each other'e guts" on a press release

A succession of personnel directors has been morning in Management. Today about how graduates these days can't spell. The mider lying assumption is that is they kant spel there can clearly be no question of hiring them.

hiring them.
I have never mastered spelling myself, and while I'm not proud of it, I do not consider it to be my worst failing as an employee. Spelling is an illogical thing and says nothing about intelligence, diligence, creative ity, trustworthiness or whate qualities the personnel directors are qualities the personnel directors are looking for. I agree that it does not look good to send letters in which half the words are masspett, but these days there is no need for that we all have computer spellchecks, and falling that there is always are dictionary. The trouble with fine set is that you need to know the set. ter is that you need to know ro how to spell the word before you find it in the book. The solution find a colleague who at spelling bees. Randgold to float mining offshoot

Gold offering to be biggest in London for a decade

By Kenneth Gooding, Mining Correspondent

Randgold of South Africa expects to list its international exploration and mining offshoot, Randgold Resources, on the London stock exchange before the biggest gold mining company initial public offerings in London for over 10 years.

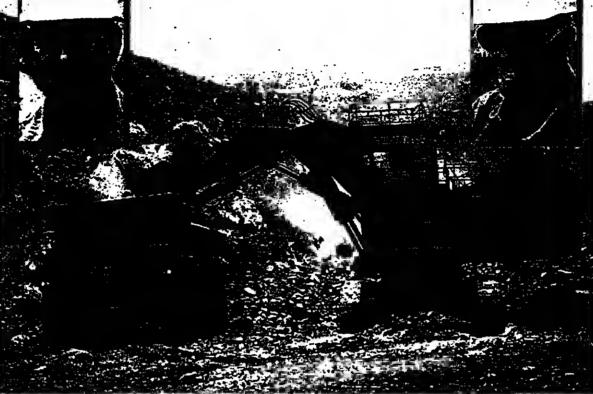

The terms will value Randgold Resources at about £400m, while Randgold will raise about 2180m. The only bigger gold company flotation in London over the past decade has been that of Ashantl of Chanz in 1994. The mining industry has

been turning more to Canadian stock exchanges, particularly Toronto's, to raise Rendgold's chairman, said: "Rendurens M'a berious, lotte terms company and it is more appropriets for it to list in London."

He said it would probably also be listed on Nasdaq in the US, and with an emerg-

android's holding will be reduced from 78 per cent to shout 54 per cent after the

Apart from having extensive gold exploration projects in Africa, Randgold Resources last August bought 65 per cent of the Syams gold mine in Mali from Broken Hill Propristary, the Australian group,

Preparing for a London flotation: Randgold chairman Peter Flack (inset right) and Mark Bristops, (inset left), managing director of its exploration offshoot Randgold Resources. The company has extensive gold exploration projects in Africa

for US\$84m. In preparation for the flotation, Randgold has repaid \$31m of debt to BHP following the Syama acquisition and has also bought BHP's 2m shares in

Resources. About 11/m of these shares were sold on to institutions in the US and Europe which have backed Randgold Resources since it was set up

BHP is understood to have received a slight discount on the \$25.50 at which the Resources shares were valued for the Syama deal.

Randgold has a bridging Corporation, the World Bank on capital equipment and loan to cover the cost of offshoot, wanted to refinance removing BHP from the

scene. Mr Flack's target is to sell the Randgold Resources shares at between \$25.50 and \$30 each, depending on market conditions

He said during a visit to Syama that, as well as making substantial changes there to bring down costs, Resources already had identified projects that should give it another four gold mines in the next five years. The International Finance

\$35m of loans, making them non-recourse and carrying a lower interest rate, as well as swapping its shares in Syama for those of Randgold Resources. This would be

BHP spent \$107m to develop Syama in two stages in 1990 and 1994, but the mine never lived up to its

expectations. Mr Mark Bristow, Randgold Resources' managing but Mr Bristow said there director, said \$68m would be

spent in the next three years

making changes to bring Syama's costs down and push output up. The objective was to reduce cash opereting costs, which were between \$350 and \$360 a troy ounce when BHP owned the mine, to \$250 in the first 15 months and then to \$210. Output would increase from 120,000 ounces a year to 210,000 and then 270,000.

At present Syama's gold resources total 4.34m ounces was potential for more

reserves to be found.

Banque Hervet may be offered for public sale

France could drop plans for trade sale of regional bank

By Andrew Jack in Paris

The French government is considering a public share offering to privatise Banque Hervet, the state-owned regional banking group, in

the next few months.

Those close to the discussions say that officials are raising the possibility of a public sale rather than e trade sale to a single buyer, as planned when the bank was first earmarked for pri-

vatisation in 1993. The change appears in part to reflect caution after recent abortive trade sales, notably of CIC, the regional banking group, and Thomson-CSF, the defence and insurer, which could be

Trade sales of other state-controlled enterprises such ag SFP, an audio-visual business, and CGM, a shipping group - have also pro-voked criticism over terms and the selection of buyers. The idea of a public offer comes as the French stock market appears to be picking up and individual inves-

tors are showing signs of renewed interest. This is already spurring the government to sell a stake in France Telecom this

However, a public sale for Hervet could cause difficulties, given the relatively small size of the bank and

the specialist nature of its

The sale is expected to raise only a few hundred million francs and it might jeopardise the tenders being considered by trade buyers. Crédit Commercial de France has expressed interest in buying Hervet and at least one other investor is

believed to be studying the dossier seriously. Unless a decision is taken in the next few weeks, the privatisation is likely to run into timing problems, given the national elections next year and a tight calendar.

Other sell-offs being discussed include GAN, the separately or alongside

On Friday, Hervet unveiled 1996 profits up 32 per cent to FFr71.3m (\$12.5m) on banking income up 8 per cent to FFrlbn.

It took provisions of FFr55m to cover restructuring costs and preparations for a single European cur-

The group stressed that in the past three years it had halved the size of its outstanding loans to the property sector - to which it had been beavily exposed without recourse to a defeasance or sale to "vulture funds"

The surge in US stock prices over the pest two years has made some of the US's top corporate executives seriously rich, according to

The value of many of the stock options granted under executive pay deals in the early 1990s has risen with the stock market. In many cases they swamp the value of incentive bonuses awarded in addition to

Luxury furniture retailer expected to deliver bullish view of current trading

Heal's poised for sharp profits jump

Heal's, the luxmy furniture retailer which is coming to the market this month, is on Thursday expected to report the first 20 weeks of the financial year - more than it

made in the whole of 1996. In a pathfinder prospectus to be published this week. Heal'a is expected to give potential investors a bullisb view of current trading. With the first 20 weeks accounting for roughly 90 per cent of group profits, and comparable sales running some 16 per cent ahead of last year, the group is likely to indicate a sharp jump in profits for the full year.

Last year Heal's mede operating profits of £1.75m on sales of £19.4m. However, the profit included a one-off £426,000 net contribution than £500,000 in a manage-

from rate rebates which will ment buy-out from Sir Ter-

Heal's operates from three stores, the most famous of which is located in London's Tottenham Court Road. From this imposing listed building, commissioned by Sir Ambrose Heal to replaca Heal family first started making beds, it has sold hand-crafted furniture since 1840. Heal's has a second store in Guildford, Surrey,opened in 1971, and last year launched a third in the

King's Road in London's Chelsea. Heal's is coming to the market through a £10m plac-ing led by Close Brothers. The float is expected to value the group at about £15m and will make paper millionaires of the three directors who invested less

ence Conran's Storehouse group in 1990.

Mr Colin Pilgrim, chief executive, who joined the group as a management trainee in 1971, will bold about 18 per cent of Heal's. Other directors are expected to retain a further 12-17 per cent. NetWest Ventures. which backed the MBO with an initial investment of just over £1m for a 50 per cent stake, will make about £7.5m

Heal's hopes to raise about £2m from the placing to invest in refurhishing its flagship store, as well as in finding new sites. The group is hoping to open about one store a year in large city centres euch as Manchester, Glasgow, Duhlin and Newcastle. Société Générale Strauss Turnbull are brokers to the group.

United Inds chief resigns

Mr Tom Brown has resigned as chief executive of United industries and has left the engineering company. He will be replaced by Mr Ken Coates, chairman, and two non-executives until a successor can be appointed. Mr Coates said the group was "immediately streamlining the man-

agement structure, saving £500,000 of annual costs". Mr Brown, who joined United in 1993, was on a one-year rolling contract. His total remuneration for last year was

£184,000; compensation has not yet been agreed.
On Friday, United reported a loss of £446,000 for the year to December 28, following a £3.2m exceptional charge relating to the sale of its lossmaking Holden Hydroman offshoot. The loss, on turnover of 250m, compared with profits of £3.55m last time on £60.6m turnover.

Mr Coates said the year had been "marred by the difficulties at Holden Hydroman" which had been sold shortly after the year-end. However, operating profits on continuing businesses were up 26 per cent to £3.76m on sales up 12 per cent to £38.1m.

CT to clear dividend arrears

Concurrent Technologies, which produces single board computers, more than doubled pre-tax profits for the year to December 31 from £566,406 to £1.3m on turnover up 84 per cent to £6.68m:

However, Mr Michael Collins, chairman, said that profits for next year may not reach the 1996 level due partly to the start-up costs associated with bringing manufactur-ing in house and also to the costs of developing and marketing new products. He added that the Aim-quoted company now had sufficient profitability and cash genera-tion to pay preference dividend arreers in full and that for the first time an ordinary pay-out of 9.1p is expected.:

Blockleys hit by rivals

Blockleys, the brickmaker, issued a profits warning following a write-down of £2m of stocks caused by weak demand and competitive pressure. It had already cut costs and production and said it would, "review the need for additional cuts in production capacity while sales are being made from stock". The company said its pre-tax loss for last year, due to be revealed in April. "will be significantly greater than current market expectations".

Fitness First looking healthy

Mr Christopher Pearce, chairman of Fitness First, stated his optimism about the health club operator's prospects in a trading statement. He said the number of new members confirmed the continuing strong growth in the health and fitness industry with three clubs - at Shrewsbury, Southend and Derby - opened already this financial year. The projected expansion programme of letween six and eight clubs for 1997 looked achievable and others had also been earmarked for 1998.

This advertisement is issued in compliance with the requirements of the London Stock Exchange Limited (the "London Stock Exchange"). It does not constitute an offer or an invitation to subscribe for, or purchase, any securities. Application has been made to the London Stock Exchange for admission to the Official List of the Ordinary Shares of The GGT Group plc (the "Company"), in issue at 28 February 1997 ("Edsting Ordinary Shares") and to be issued ("New Ordinary Shares") in connection with the Placing and Open Offier and the proposed acquisition of BDDP S.A. (the "Acquisition"). It is expected that the shares will be admitted to the Official List and that dealings will commence on 3 April 1997.

The GGT Group plc

(Incorporated and registered in England and Wales under the Companies Acts 1948-1976 with registered number 1482152)

Proposed acquisition of BDDP S.A.

Placing and Open Offer by Kleinwort Benson Limited to raise approximately £55 million at a price expected to be between 220p and 280p per share

Share capital prior to and immediately following the Placing and Open Offer

E Numbe

Isuzu claims better diesel engine

By Michiyo Nakamoto

Isuzu, the Japanese vehicle maker, says it has developed a diesel engine that is twice as fuel-efficient as a comnarable petrol engine, and 30 per cent smaller and 25 per cent lighter than other diesel

The direct-injection engine uses a new injection system which enables a 3,000cc class engine to run more than 20 kilometres on one litre of diesel, compared with 10km abls to reduce the weight of In spite of the substantial

for a petrol engine of the same size.

Isuzu, which is 37.4 per cent owned by General Motors, aims to use the engines in GM's European vahicles, mada by Opel. Although the engines would be primarily aimed at the European market, a decision has not been made on a production site. The engines are likely to be made initially at

its factory in Hokkaido. By using aluminium for all main components, Isuzu was

compared with previous diesel engines of a comparable size. The size of the engine is also reduced by 30 per cent. Japanese carmakers,

which have been slow to davelop diesel engines, are starting to put more emphasis on them, as they expect greater demand from Europe and, eventually, Japan.

Diesel engines have suffered from a bad image in Japan, because they can be noisy and emit black furnes.

the engines by 25 per cent, discount on diesel fuel in time for Japanese drivers to Japan, diesel engines make overcome their suspicion of up only about 3 per cent of diesel fuel, Japanese carall vehicle engines, including makers expect demand for trucks, on industry diesel engines to grow grad estimates.

This compares with about 23 per cent in Europe, where they are popular among fuel injection which reduces environment-conscious consumers because they emit less carbon dioxide. The industry expects diesel engines to take a 30 per cent share of the engine market within two years, which it in Europe by 2000.

ually in the years ahead Meanwhile, Toyota has

developed a new system for noise and improves the fuel efficiency of direct-injection diesel engines. Toyota plans to develop an engine based on the new technology expects to use in its Euro-

Swiss Re to sell on SAFR to Partner Re

SAFR, the French insurer, is to be taken over by a Bermuda-based reinsurance company, as a result of a takeover bid by Swiss Re.

Pariner Re, the New Yorkquoted but Bermuda-based reinsurer in which Swiss Re holds an 11 per cent stake, began its due diligence on SAFR on Friday. This should be completed by the middle of March and lead to its rapid acquisition of the

group.

The takeover comes after Swiss Re, which owns 21 per cent, announced on Thursday its intention to buy the outstanding shares in SAFR at FFr1,470 each. These are held by AGF, the French insurer privatised last year, and its rival Athena.

In the next few weeks it will launch a public offer for the remaining shares, which is likely to succeed, given that both Crédit Commercial de France and an individual, who between them hold a further 7 per cent, have already indicated their support

In a second stage, Swiss Be will sell SAFR to Partner Re, in part for cash and in part for additional shares in the Bermudan group, bringing its total participation up to 21 per cent.

Partner Re specialises in natural catastrophe cover, and other infrequent but high intensity claims, while SAFR has a broader reinsurance portfolio.

Mr Hervé Cachin, chairman of SAFR, said yester-day he expected no fundamental change in strategy but would be holding meetings with Partner Re soon to discuss synergies.

The decision of AGF and Athéna to sell their stakes represents the latest stage in the withdrawal of traditional French insurers from the reinsurance market.

The FFr2.5bn (\$439m) in cash paid by Swiss Re to AGF for the transaction has egain fuelled speculation that the French insurer may be seeking acquisitions.

NEWS DIGEST

Village Roadshow !!! h plans expansion

Village Roadshow, the Australian entertainment company, plans to open 300 new multiplex cinemes in Europe over the next four years in a joint venture with Warner Bros International Theatres, a subsidiary of Time Warner, the US media group. The two companies about operate 17 cinemas in the UK through their joint whether Warner Village Cinemas, and intend to open another at by 2000. They plan to establish a chair of 30 multiplement in Italy over the next four years, with the first schedule to open this autumn.

Warner Village has aggressive expansion plans for Germany, France, Switzerland, Greece and the Casch Republic. Warner has formed a separate joint venture to run cinemas in Spain and Portugal with Insimundo a Spanish operator.

The investment by Warner and Village Roadshow has part of the expansion of the European cinema industry, which is considered to have significantly higher growth potential particularly for multiplexes, than the mature North American market. Virgin, the UK leisure group, to considering plans to extend its cinema network land of European countries.

Blow to BASF programme

The German Cartel Office has served a blow to the disposals programme at BASF, the German chamicals group, by barring the long-awaited sale of a controlling stake in its potash mining subsidiary, Kali & Sale, to Canada's Potash Corporation of Saskatchewan.

The cartel office said the acquisition of a 51 per cent interest in Kali & Salz by PCS, the world's biggest potas manufacturer, would meen the German group's domine position in the domestic market could not be challenged in the long term. Kali & Salz has an 80 per cent share of the German market for potash fertilisers. BASF immediately vowed to appeal against the decision to the German finance ministry.

Sarah Althaus, Frankfill Ciments Français ahead

Strong growth in North America, Morocco and Turkey helped propel Ciments Français, the French coment group, to a 16 per cent advance in annual profits, from FFr275m to FFr318m (\$56m) on sales down 2.8 per cent from FFr12.6bn to FFr12.2bn.

The company said a 26.4 per cent reduction in franchi costs had more than compensated for the 69 per cent till. in its operating result from FFr2.09bn to FFr1.06bn. It was confident international activity would continue to pick wi in 1997 but foresaw no short-term improvement in the French, Belgian or Spanish markets.

Alcatel to launch 'SkyBridge

Alcatel Alsthom, the French telecoms and audinoscine group, has filed an application with the Federal Communications Commission to launch and operate a \$3.5bn 64-satellite constellation to provide interactive broadband services to business and residential custom The company said the system - to be known as SkyBridge would be operational in 2001, in addition to Internet access, it would provide bandwidth on demand for other types of high-speed data communications.

Donid Own

Louis Dreyfus aims to let outsiders in

Louis Drevfus, the French multinational trading organisation, expects to offer shares in more of its industrial businesses to outside investors, as part of a gradual transition towards e plywood and European menholding company structure.

Mr Gérard Louis Dreyfus made the disclosure in a rare interview at the company's Paris base near the Arc de Triomphe. Now 64, he has run the traditionally secretive, family-controlled business since 1969.

The company has annual turnover of more than \$20bn. Its interests include shipping, fole gras, electricity and the Four Seasons hotel in Washington. It claims to tional grain trading opera-

Results 1996: Consolidated sales are confirmed at FF 28.9 billion. up by 14.4% over 1995, 2.5 pointe of which are related to the net extension of the Group's reporting entity

and I point due to currency variations. International sales increased by 23%, accounting for 68% of

consolidated sales against 83% in 1995. Original equipment salea rose by 18% over 1995, while aftermarket sales increased by 8%.

Cross margin was up by 18.3% and operating income by 35.7%. Income before tax stands at FF 1,484 million, up by 37.4% over the previous year. This increase would have been 58.9%, excluding the extraordinary capital gain of

FF 146 million made in 1995.

Net income after minority interests increased by 18.8% to FF 1,200 million, that is 4.2% of consolidated sales.

■ At end 1998, the Group's Stockholders' equity rose to FF 10,556 million after the payment of an extraordinary dividend of FF 700 million. Net indebtedness stood at FF 673 million, that is 6% of equity.

E Dividend 1996: An extraordinary dividend was paid out on November 18, 1998 amounting to 10 francs net per share, 15 francs including tax credit. The General Meeting of Shareholders will be asked to approve an additional dividend of 2 francs per share, that is 3 francs including tax credit. The total dividend paid out by Valeo for 1996 would therefore be 12 francs (18 francs including tax credit), representing an extraordinary pay-out ratio of 70%.

5 Other significant events 1996: The sale

tion to the Group which continued to pursue its objectives. CGIP became Valeo's largest shareholder with 20% of share capital, while the Caisse. des Dépôts et Consignations (CDC) increased its shareholding to nearly 7%. The Group thus has the shareholding structure necessary to develop its strategy as an independent supplier.

As in previous years Valeo's sales in Europe, North and South America and in Asia. outperformed automotive output in these areas making 1998 another growth year for

Through a volume effect and productivity gains, Group Branches showed that they were capable of cutting costs and offering their customers competitive products.

To accelerate its evolution, Valeo actively managed its portfolio of activities by strengthening its presence in fast expanding markets such as air conditioning through stakes acquired in the Czech company KSA and in the Argentine group Il Tevere/Mirgor, or security systems with the purchase of Fist SpA and the lock systems activity of Ymos AG. Non-strategic businesses

Cutlook 1997: At the start of 1997 the automotive market looks set to stay at the present high level in Europe, North America and Asia but should be more active in South America. Group objectives for the coming year remain focused on dynamic growth based on cost reduction, quality improvement, innovation and globalization.

Del Monte Foods to change hands

in New York

arm of the four Del Monte food businesses around the world, is to change hands again seven years after investors by RJR Nabisco, the US and food and tobacco group. It is being bought by Texas Pacific, a private investment group led by Mr David Bonderman, for an undisclosed sum.

The San Francisco-based Del Monte Foods is said to he the biggest branded manefecturer and distributor of canned fruit and vegetables in the US. It had revenues of \$1.2bn last year and has 2,100 regular workers, with sonal employment rising to 12,000. Its product range includes 375 branded items. RJR Nabisco sold Del private investors for \$1.48bn. including debt.

At the time, Del Monte Del Monte Foods, the US Foods included the European business, but Del Monte Foods Europe was subsequently sold to another investment group for \$375m. being sold to a group of RJR Nabisco sold Del Monte Fresh Produce to Polly Peck International and Del Monte Far East to Japan's Kikkoman group.

Texas Pacific has made two previous investments in the food industry, in 1995 it bought a North American marshmallow and confectionery business, now called Pavourite Brands, from Kraft Foods, and last year it bought the Beringer Wine Estates in California from Nestle.

Its other investments include substantial interests In Continental Airlines, America West Airlines, and Monte Foods to a group of Ducati Meccanica, the Italinstitutional, corporate and ian motorbike manufacturer. INTERNATIONAL NEWS DIGEST

Prudential of US improves position

Prudential Insurance of America, the largest US life insurer, made some progress towards rebuilding its capital position in 1996, adding \$684m to its capital base in a year marred by costly litigation over misleading sales practices. Its total capital base now stands at \$12.05hn, well up on the \$9.5bn it recorded two years ago. It had been hit by insurance losses, and compensation claims relating to sales practices at Prudential Securities, its brokerage division.

Prudential, a mutual insurer unrelated to the UK company of the same name, said it had been helped by strong results from its insurance division, and from Prudential Securities, which benefited from strong stock markets. However, the company had to make reserves to cover the costs and fines which have followed its attempts to compensate policyholders who were victims of mis-selling. Last month it reached settlements with regulators in three states, including Florida which had taken a hard line on the issue. It has agreed to pay compensation of at least \$410m in total, and expects the John Authers, New York final sum to be nearer \$1bn.

Postabank not afraid of run

Postabank, Hungary's second largest bank, yesterday sought to reassure account-holders after a weekend rush to withdraw deposits sparked by rumours of insolvency. The wave of withdrawals began on Thursday and accelerated on Friday, when the bank announced it would open over the weekend to satisfy any demand. Withdrawals totalled Ft 20bn (\$115m) between Friday and Sunday, the bank said yesterday. Chief executive Mr Gabor Princz stressed that the bank had no liquidity problems, with Ft 70bn in liquid assets. He said he could not explain the panic among depositors. Postabank made a 1996 pre-tax profit of Ft 3.2bn and had total assets of Ft 388bn (\$2.5bn) at the end of last year.

Mr Gyorgy Suranyi, president of the National bank of Hungary, speaking on Hungarian radio on Saturday, said the withdrawals did not threaten the stability of Postabank, which had the liquid reserves to meet demand. The bank could always borrow money on the inter-bank market, and funds from the national bank would be available if necessary. Kester Eddy, Budapest

Salomon reprimanded in HK

Salomon Brothers Hong Kong has been reprimanded by the territory's securities watchdog for falling to understand fully a securitised mortgage product which it sold to clients. The clients, unaware of the risky nature of the product, incurred considerable losses.

The Securities and Futures Commission was alerted when buyers of the Collateralised Mortgage Obligations complained after they had bought them from the bank's Private investment Department (PID). SFC said: "When the bond market collapsed in February 1994 various clients who had not fully appreciated the risks of Collateralised Mortgage Obligations incurred considerable losses as a result of holding high-risk versions of this product." It said that staff in the department, were not promptly registered with the Commission when undertaking their duties. Moreover, certain staff when marketing the mortgage securities did not fully understand the nature of the products, and as a result clients bought them without fully appreciating the risks.

As part of a global change in strategy, Salomon in April 1995 - one year after the end of SFC's investigation - closed down its private banking operations, to concentrate on institutional business. Staff involved in Hong Kong PID dealings during the investigation period, which stretched from April 1993 to March 1994, are no Louise Lucas, Hong Kong longer with the group.

Alcoa to reward shareholders

Alcoa of Australia, the alumina refiner and marketer whose main shareholders are Aluminium Company of America and Australia's WMC, is to "decapitalise" its balance sheet by returning A\$300m (US\$233m) to its owners. Alcoa of America will receive A\$180m; WMC, the Australian resources group, will get A\$117.75m; and Sydney-based QBE Insurance, A\$2.25m. The move is subject to approval at a shareholders' meeting next month, and is likely to be implemented by mid-year. Nikki Toit, Sydney

Brambles rises 15% midway

Strong growth from its North American operations helped Brambles, the Australian transportation group, to report a 14.8 per cent increase in first half profits at A\$117.2m (US\$91m) after tax. Sales fell A\$145m to A\$1.45bn, with the decline explained by exchange rate movements and the sale of some assets. The company said that Australian operations continued to perform "sluggishly", with little sign of any upturn in the sectors where the company

iberdrola improves 13%

Iberdrola, Spain's largest electricity company after the state-controlled Endesa, reported a 13 per cent rise in consolidated net profit last year to Pta96.3bn (\$672m), from Pta85bn in 1985. The improvement, which followed a 22 per cent rise the previous year, partly reflected a sharp 28 per cent rise in interest charges on its debt. Earnings before tax showed a stronger 28.5 per cent increase to David White, Madrid

Mazda and Ford move closer

Mazda, the Japanese carmaker 33.3 per cent owned by Ford, is integrating five North American companies to improve its efficiency in the region. Mr Richard Beattle, an executive director at Ford, has been appointed to assist Mr Henry Wallace, Mazda president, in strengthening the Japanese company's position in North America. The move underscores the growing collaboration between Ford and Mazda since the US company took a controlling stake last April. Mr Beattle is the 11th management level official at Mazda sent in from Ford. The restructuring of Mazda's North American operations comes as Mazda and Ford are working on sharing vehicle platforms around the world. William Dawkins, Tokyo

SCHRODER INTERNATIONAL SELECTION FUND

Société d'investissement à capital variable Registered office: 5 me Höhenhof, L-1736 Senningerberg RC Luxembourg B8202

NOTICE TO SHAREHOLDERS

EXTRAORDINARY GENERAL MEETING OF SHAREHOLDERS

of Schroder International Selection Fund (the company") originally planned for 14th February 1997 at 11.00 a.m., will now be held at the registered office at 5, rue Höbenhof, L-1736 Semingerbeng at 11.00 a.m. on Wednesday 12th March, 1997, for the purpose of considering and voting upon the following matters:

AGENDA

Amendment of Article 16 of the articles of incorporation of the company, replacing at the end of the text of the 22nd line of this article the full stop by a comma, and adding

"other than in those classes of share where purposes to Danish real-interest-law (paragraph 3 e, section 1) the investment policy disclosed in the prospectus prohibits the class of share from investing in bonds, convenible bonds and rundertakings of the open-ended type."

2. Amendment of Article 16 of the articles of incorporation of the company, replacing at the end of the text of the 51st line of this article the full stop by a comme, and adding

"other than in classes of share where pursuant to the investment policy declared in the prospectus, the class of share is prohibined from investing in collective investment undertakings of the open-ended type."

Amendment of Article 16 of the articles of incorporation of the company, deleting and replacing the two last paragraphs with the following text:

"In any single class the aggregate amount of cash and underlying value of hedging instruments must not exceed twenty five percent of the remaining net assets. In these classes the aggregate value of the commitments relating to the use of arcial instruments may not exceed the estimated market value of the assets to be hedged".

4. Any other business

VOTING

Resolution on the items of the agenda of the Extraordinary General Meeting will require a quorum of 50 per cent. and a majority of 3/4 shareholders present or represented at the meeting voting in favour.

stered shareholders who cannot attend the meeting in person are invited to send a ly completed and signed proxy form to the registered office of the company to arrive no later than 10 March 1997.

In order to take part in the meeting of 12 March 1997, the owners of bearer shares must deposit their shares live business days before the meeting at the registered office of the company as set out above, or with:

Securities Department Schroder Investment Management Limited 33 Gutter Lane

London EC2V BAS

Schroders

Separate proxy forms will be sent to registered shareholders with a copy of this notice and can be obtained by bemer shareholders from the registered office of the company,

ANNUAL GENERAL MEETING Notice is hereby given that the Annual General Meeting of Amer Group Ltd ("the Company"), will be held on Tuesday, 18 March

1997, et 2 p.m. et Amer Group Ltd's Head Office, Mākelānkatu

The agenda of the Annual General Meeting will be matters as per article 16 of the Articles of Association.

General Meeting, unless otherwise stipulated.

Participation in the Annual General Meeting Only a shareholder who has been recorded by 7 March 1997 as a shareholder in the Company's share register, as maintained by the Finnish Central Securities Depository Ltd (Suomen

Arvopaperikeskus Oy), has the right to participate in the Annual

Notification of Intended participation at the Annual General Meeting must be given to the Company not later than 4 p.m. on Friday, 14 March 1997, either in writing to: Amer Group Ltd. Share Register, P.O. Box 130, FIN-00601 Helsinki; or by telephoning (+358-9-7577 201/Mirje Vatanen). Letters should be delivered before the close of the notice period. Proxies should be forwarded to the above address together with notice of attendance.

Because of the significant losses incurred during 1996, the Board of Directors propose that no dividend be distributed in respect of the financial year ended 31 December 1996.

Helsinki, 3 March 1997 **BOARD OF DIRECTORS**

GE in drive to double sales in Europe

By Peter March

General Electric, the world's largest company by market capitalisation, is looking to double its seles of domestic appliances in Europe over the next three years.

The company's efforts follow a European campaign in the early 1990s by Whiripool, GE's main US rivel in white goods and the world's third biggest domestic appliance maker. The sales drive, which cost it tens of millions of dollars, is generally thought to have failed.

Whirlpool's failure to womand gionificantly in

differences between consumers in different countries. GE wants to increase its annual white goods sales in Europe from about \$1bm to 32bn in 2000. The figures include revenues from General Domestic Appliances, a

GEC of the UK. a year. For GE to hit its tar- mated 20 per cent and 16 per from rival white goods progets in Europe, GDA would have to expand production greatly, mostly for export to the rest of Europe.

H GR manhed its mais, the

pan-European marketing pean market for white goods, designs that catered for "s "I hope he has not taken out strategy, which ignored the which include fridges, cook- diversity of product types" a long lease on his house strategy, which ignored the ers and washing machines, would climb from about 4 per cent to 8 per cent.

GB, the world's fourth biggest maker of white goods, is the eighth largest supplier of white goods in Europe, including GDA's sales. It is UK-based joint venture with well behind the market lead- tries, sometimes at the ers - Electrolux of Sweden GDA employs 5,000 people and Bosch-Siemens of Ger-and has sales of some \$750m many, which have an esticent respectively. Mr Dennis Zahmski, man-

aging director of OE's Euro-

the company would launch a

within the European market. He indicated that GE had learned from the efforts of Whirlpool, which has also appeared to underestimate the keenness of European producers to cling on to market share in individual coun-

expense of building profits. Mr Zalupski's ambitions have met with scepticism ducers, which regard the Buropean market as extremely tough, with little pean appliances arm, said overall growth.

because this plan does not seem realistic " Whirlpool is thought to be in third position in the Euro-

pean industry, with a market share of about 9 per cent, followed by Miele of Germany and Elfi, Candy and Merioni, three Italian companies. However, its share of the market has grown only fractionally in the past five GE hopes to improve its

chances in Europe by plac-ing orders with independent white goods producers for One consultant in the GE-designed machines with

FINANCIAL TIMES THIS WEEK

Global Investor / Richard Waters in New York

Bull market steered by options?

Remember when the odd \$10m - or even \$5m - made a chief executive very rich? Not any longer: after the 1990s bull market, you now need at which has become a sort of least \$100m to count as a code for: "Keep your share serious participant in corpo-

Current wisdom in US compensation circles is that there is nothing wrong with this state of affairs, as long as shareholders are getting rich as well. The modern exacutive share option scheme is meant to bave aligned the interests of directors and outside shareholders perfectly. It may not be that simple, though. With stock options delivering sucb large rewards after Wall Street's headlong rise,

most US executives have already bowed unquestioningly before the alter of Shareholder Value, a phrase price rising, or else." Add in the huge amount of cash wasbing into corporate America's coffers and you have a potent combination of forces which alraady seems to be affecting the dynamics of the stock market. That could have a disruptive effect.

The poster boy of the option movement, of course, is Michael Eisner. Walt Disney stock he already owns, or which is covered by options, is worth more than \$500m - so why all the fuss last week about the \$300m or so of options his board has

But it would be wrong to see this as an issue solely between Disney and its shareholders. Also noteworthy has been John Reed, chairman of Citicorp, who exercised \$40m of options last year. He now has \$120m of the hanking group's shares, and options worth another \$57m.

Numbers like these make even Wall Street bonuses seem small. But then, Richard Fisher, chairman of Morgan Stanley, doesn't have to scrape hy on the \$10.5m he was paid in 1996: according to a filing last week, he also has shares and options worth \$250m.

rewards accruing to Amer-lca's business elite have been something of a one-way bet - unlike the wealth of It is worth dwelling on the shareholders at large, which potential impact of these mind-boggling numbers. And rises and falls with corporate they are just a sample; the fortunes. That hardly looks

put on display, is only just

crop of business leaders, it has been the favourable eco nomic environment that has ket's rise. Perhaps Alan Greenspan, who wins plaudita in corporate boardrooms, should be cut in on the riches.

It is ironic, then, that corporate America's addiction to the option may indirectly be causing the Fed chairman something of a headache. Ha again lamented in public last week about the lofty level of share prices - but most bosses have their minds set on lifting them yet higher. Tha psychology behind this state of affairs was apparent in a survey con-

ducted last week by the

Business Council. More than half of executives questioned said that US share prices in general were too high. Only per cent, though, thought their own company's price had risen too far. Would you trust these people to invest your family's savings? But ss what: not only do they think their own shares are cheap, they are putting billions of dollars on the line to back that view.

0.53 -0.37 0.16 1.86 10.67 13.12

Total return in local currency to 27/02/97

Popular wisdom holds that it is the money flowing into mutual funds that has driven US share prices up. Perhaps so: bnt the cash spent by companies to repurchase their own stock is bacoming an increasingly material part of the equation. As the chart shows, US companies now number among the biggest investors the stock market though mntual fund flows

and corporate buy-back programmes are not precisely comparable, since the latter to buy shares in tha future. With their own personal fortunes on the line, it is not of the US's corporate elite want to keep the bull market momentum going. What that says about the value of US stocks right now is another

COMPANY RESULTS DUE

BNP will announce a sharp increase

Banque Nationale de Paris is expected to report sharply improved full year net profits, with analysts' estimates ranging between FFr3.1bn and FFr3.5bn, compared with FFr1.78bn in 1995. The improvement is attributed to higher revenues, cost controis and reduced provisions. However, one area of uncertainty could be the FFr2.1bn book loss BNP will have iney late last year warned included in its accounts from the sale of shares in UAP, following Axa's bid to merge with the rival insurer, BNP says the loss will be covered by capital gains from asset said that full-year turnover

lyst says it may not have fully succeeded in doing so.

■ French defence electronics group Thomson-CSF is on Wednesday expected to report a slight increase in The 1995 figure was FFr1.96bn, This year's figures will be closely watched by Lagardère and Alcatel, contenders in the government's planned trade sale of Thomson-CSF.

 Other results from France this week include those of insurer Scor, bank Crédit Commercial de France and packaging group Pechiney, all due on Thursday, Pechthat it would slip back into the red on heavy provisioning for restructuring and for legal action against a subsidlary, in February this year it

income before the provision is seen at less than the FFr730m reported for

 Weak stainless steelprices and increasing depreciation full-year operating profits. charges related to new investments coming on stream have hit profits at Spanish group Acerinox, according to analysts. They expect the group to report 1996 profits of Pta15bn. Pta18.9bn, down beavily from Pta34.4bn in 1995. However, the group remains upbeat on this year, with new capacity at US plants, a new production facility in Andalucia, and strengthening prices projected to offset cyclical weakness.

■ Similarly, Dutch steel group Hoogovens is expected on Thursday to report much weaker profits, at between national banking group Fl 280m and Fl 292m against sales, but one French ana was down 4 per cent. Net F1507m. The figures last over as the largest market

Smith & Nephew, medical equipment company, is tomorrow expected to report rather subdned profit growth for last year. The main problem has been pricing pressure in the US as healthcare budgets have become tighter. Pre-tax profits are forecast at £185m. compared with £180.4m in

■ British Biotech will report its nine-month results to December on Wednesday, although analysts will be looking for announcements about the progress of the group's pipeline drugs.

■ Cadbury Schweppes, the soft drinks and confectionery group, is expected to report pre-tax profits before exceptionals of about £590m on Wednesday, up from £526m. The City of London will be expecting Mr John

Sunderland, chief executive

INTERNATIONAL EQUITIES By Edward Luce

his plans to increase shareholder value.

Compiled By AFX News

■ T&N. the engineering group, is expected to report reduced underlying profits of £90m-£96m (£120.1m) for 1996 on Wednesday before asbestos provisions, insurance costs and expenses relating to its options over almost 25 cent of Kolbenschmidt, the German pistons group.

■ Industry analysts expect GKN, the motor components, defence aquipment and industrial services group, to announce legal provisions of £250m-£260m on Thursday when it unveils its 1996 figures.

Underlying pre-tax profits, nevertheless, are expected to rise 13 per cent to £365m.

drugs company, is expected to unveil pre-tax profits of

the since September, to outline about £2.95bn for last year on Thursday, an 18 per cent increase on 1995. Adverse currency movements may lead to lower figures. But, with its two leading drugs, Zantac and Zovirex, now facing generic competition, stors will be more interested in the growth rate of tha rest of the portfollo. There should be some indication of how the large number of new product launches depressing profit margins.

> Analysts are expecting Ladbroke to report underlying pre-tax profits of £155m-£165m (£121m) for 1966 on

Thursday. The rise is on the back of strong recovery in betting and good perfor-mance from international botels. The market will want to know when Hiton Hotels Corporation is to take its 5 per cent stake in the company and whether Ladbroke will issue new shares.

THE THAI PRIME FUND LIMITED

(Incorporated in the Republic of Singapore)

MARKETS: This Week

Mr Alan Greensbar chairman of the Federal Reserve, cast his customary apell over the US bond markets last week. His argument to the Senate that tight labour markets could lead to higher inflation led to sharp falls in bond prices, and reawakened speculation that a:rise in interest rates was due before long, but . probably not this month.

The yield on the 30-year Treasury long bond rose from 6.65 to 6.78 per cent on Wednesday, when Mr Greenspan made his speech. and continued to rise for the rest of the week. It finished the week at 6.802 per cent.

Stock prices did not react as strongly, except in the technology sector, which had powered most of their gains in the latter half of last year. The Nasdao composite index fell through 1,300 at one point on Friday, having gone as high as 388.06 in January. its Friday close of 1,309.00 was its lowest since the first week of the year.

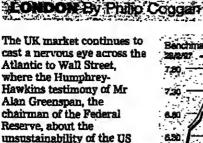

A lot of economic data is expected this week, but trading is likely to be dominated by non-farm payrolls for February, to be announced on Friday. MMS International, tha

research organisation, says the analysis' consensus is that payrolls will have

gained 223,000, a big rise helped by the mild winter. Hourly earnings are projected to have risen by 0.3 per cent, with an unemployment rate of 5.3

per cent. CIBC Wood Gandy says the bond market has established a monthly pattern of price declines leading up to the payroll report, followed by a ... recovery when inflation proves positive, and says this pattern will repeat itself in March.

The domestic focus will be on corporate results. Everything else seems to be on hold. Although Mr Kenneth Clarke, chancellor of the exchequer, meets Mr Eddie George, the governor of the Bank of England, on Wednesday, almost no-one expects base rates to rise before the election. Traders may accordingly

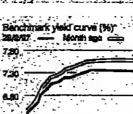

stock market's rise prompted

falls last week.

pay some passing attention to figures on narrow money supply, M0, and consumer credit this week but, given the electoral constraints, tha data are a touch irrelevant. The poll itself is now widely expected to be on

May 1, after the Conservative party's defeat in the Wirral south by-election and the decision by the Ulster Unionists not to try to unseat the administration.

However, there are plenty of results to keep traders busy, with ABP, BAT, BICC, BTR. Cadbury Schweppes, General Accident, GKN, Glazo Wellcome, HSBC,

Ladbroke, Rolls-Royce and Royal & Sun Alliance all reporting. So far, the season has proceeded without a significant shock from a leading company, but with the market trading on a historic price earnings ratio of over 18, healthy earnings growth is needed to justify

current levels. Brian Marber, the technical analyst, has turned short-term bearish about the UK following recent falls, but he does not think the bull market is yet over.

FRANKFURT By Sarah Althaus After hitting a record high on Thursday, the German stock market stuttered again at the end of last week amid weak signals from Wall

Street and speculation swiftly denied by the Bundesbank - that Germany was about to announce a delay to Emu

Nevertheless, most participants remained optimistic the DAX blue chip index would resume its strong advance in the medium term. Despite shedding 17.08 points to 3,259.64 on Friday, the key index still managed a gain of more than 2 per cent over the week. The stronger dollar and recent favourable corporate earnings reports are buoving sentiment

The market will be

keeping a close eye on a slew of economic data due this week, notably February memployment. fourth-quarter GDP and January industrial production. The main focus will be on the johless figures, with the pan-German rate generally expected to hold steady at January's post-war high of 12.2 per cent

Analysts forecast a elight fall in the seasonally adjusted data, mainly because of better weather. No surprises are expected from the Bundesbank's

meeting on Thursday,

The outlook on interest rates is stable. Comments by Mr Yasuo Matsushita, governor of the Bank of Japan on Friday were seen as indicating that there will be no rate rises in the near future, even though inflation is expected to rise in April when the consumption tax is raised from 3 to 5 per cent.

February vehicle registrations statistics are dne today. Fourth-quarter GDP data could also be released this week but the date is not fixed.

Crop support prices in focus

revaluations for sterling and the Irish punt are commanding attention. Last Thursday they entered a third confir-mation period for revaluations, and if they remain at their current rates through two further confirmation periods, revaluations will be" set for March 29.

translate EU subsidies are translated from Ecu to local currencies - thus a revaluation causes a reduction in

support prices.

Possible green currency sterling of about 8% per cent, according to market Cereals Authority.

two currencles, Sterling was revalued by 5.4 per cent on January 21, and before that by 2.95 per cent in November last year. In January sterling The green rates used to just missed a double revaluation, as it was trading at nearly 10 per cent above the erren rate.

However, a further revaluation might not have much If the revaluations go impact on commodity prices ahead, the green rates at. in the short term. Cereals that date would be recalcuing been trading above lated to halve the gap intervention prices, which would be cut by a revaluathe green rate. On last Frittion. > short-term contracts. The idea that a move to a single European currency might eliminate the complex agrimonetary system will be debated at a conference in London on Wednesday, held by Agra Europe London.

Mr Jean-Marc Gazagnes, manager of agrimonetary affairs at the EC's agriculture directorate, will discuss the system post-Emu, while other speakers will consider the effect of the change on the food industry and individual commodity sectors. Humphrey-Hawkins testi- the most likely high spot of

Wall Street left the European stockmarkets looking uncertain on Friday. Traders were peering ahead cautiously to this week's widely-

watched US non-farm pay-

rolls data.

Equities notched up a modest net gain over last week. There was a continued flow of solid company profits plus a dramatic bounce for the Club Med share price which added a fresh chapter to France'a corporate restructuring story.

Yet there were signs on Friday that outside events had begun to impinge more readily on traders' thinking. Brokers admitted that the slide in US bonds had rattled

A week of nervous swings on mony by Federal Reserve a busy week for company chairman Mr Alan Greenspan, the US long bond yield was standing at 6.47 per cent. By Friday it was above

> Retailers are a hot topic in France. The latest household consumption figures (for January) were very strong and the sector has been buoyed lately by all sorts of

takeover talk. Casino, the supermarket group, has been in the thick of the action, in spite of denials from the company of an impending deal with rival retailer, Promodes.

Both companies announce results this week: Casino on Thursday and Promodes a day later.

results in Amsterdam. European steel shares have come in for something of a rerating in recent weeks, owing to an upbeat statement on steel prices from French leader, Usinor Sacilor.

A number of heavy-weight broker buy notes are known to be in circulation. Hoogovens' 1996 results are expected to be halved, but bulls of the sector are banking on an optimistic 1997 assessment from the group.

STOCKHOLM

Recent results news from the Nordic bloc have heen disappointing. Norwegian investors have had to absorb a whole raft of indifferent Swedish investors the numwere a visible body-blow.

Increasingly, the message from the Swedish corporate sector is that there are preclous few indications that 1997 can produce an upturn

in European demand. Electrolux, which provided a clear pointer to last year's performance in January, puts out full 1996 results on Thursday.

Insurance leader Skandia weighs in on Wednesday: and Aga produces results today.

HONG KONG

Jitters over the possibility that interest rates might be raised could depress the stock market this week.

The benchmark Hang Seng index closed on Friday more than 1 per cent lower results of late, while for at 13,398.72 on worries about the trend of US interest rates rates imported from the US bers from ABB and Sandvik following last week's warn- in to Hong Kong via the ings about pre-emptive rate currency peg.

increases by the US Federal Reserve chairman.

Dealers expect sideways trading, with investors remaining cautious.

Support for the market is seen at 13,000, and brokers reckon a strong performance from HSBC Holdings, the global banking group which reports its results today. could provide some underpinning. However, shares in both HSBC and its big subsidiary Hang Seng Bank fell steeply on Friday.

Other themes expected this week include property shares and China plays, the so-called red-chips.

The latter are continuing to ontperform in the run-up to the June official handover of the colony to China.

Property shares will suffer from any rise in interest

US economic data watched for signs of rate rise

Last week Mr Alan Greenspan, chairman of the Federal Reserve, signalled US non-farm payrolls figures ing US economic data to see less than the increases for whether they give him any December and January. ammunition: Many expect a Other US data to watch this 25 hasis point rate rise to follow the next Federal Open Market Committee meeting on March 25.

Politics puts Ecuador on hold

uncertain after the recent political upheaval. On February 6, after two days of demonstrations and netional strikes, congress voted out Mr Abdala Bucaram, the democratically elected president, and a few days later replaced him with Mr Fabian Alarcon as interim president antil August 1998.

"At this stage it is very hard to tell what will happen in the market over the next six months. The country has done a good job of restoring stability quickly, so it depends on investor confidence in the new regime." says Ms Shannon Laughlin, an IFC market analyst.

After rising an average 4.2 per cent e month in the last quarter of 1996 the IFC dollar index for Ecuador fell 2.8 per cent in January. Local indices have since been flat.

Some local analysts see the depressed market as a buying opportunity. "If analysts look e bit more closely at Ecuador, they will see financial sector stocks that are undervalued," says Mr Marco Lopez, manager of stockbrokers, Prebursatil

Prospects for Ecuador's are banks. The others are fledging equity markets are cement producer La Cemento Nacional; brewer Compañia de Cervezas Necionales: and retailer Supermercados la Favorita.

Morever, equities represented only 3 per cent, or \$145.9m, of total trading. In a period of high interest rates, attention focused on bonds. Development of the equity

market requires big share issues, which could result from a privetisation programme, and for large institutional investors such as the central bank and armed forces' pension funds to par-ticipate, says Mr Lopez. The introduction of private pension schemes could be another source of liquidity.

The government plans to go ahead with privatisation of Emetal, but is opting for capitalisation and concessions to the private sector for the electricity industry and will cut Mr Bucaram's electricity tariff increases by 50 per

Even Mr Bucaram was wary of tackling the politically sensitive issue of private pension provision, although the state system is seriously underfunded.

"The exchanges have been working very hard, for example on regulatory issues, but the real need is for overall economic infrastructure development and

tive, he warns,

Alarcon, says Ian Campbell, Latin American economist at emerging market bonds was ABN-Amro in Amsterdam. interrupted last week as investors, spooked by fears of US monetary tightening. Spreads are expected to tighten over the next three decided to take some hefty to six months, but this may all fall apart as the 1998 presprofits. However, by Friday afteridential and congressional elections approach and con-

noon, many observers agreed that the sell-off did not herald the beginning of the end for the emerging markets, but represented, if anything, an opportunity to enter these markets at more attractive prices.

"This is not about credit fundamentals - it's ebout US interest rates and market dynamics," said Mr Jerome Booth, head of emerging markets research at ANZ Investment Bank.

Selling was particularly heavy on Friday, and by the end of the week yield spreads of emerging market bonda over US Treasuries had widened significantly.

The weaker credits - Bulgaria, Venezuela and Ecuador in particular - got the worst pounding. Brady bonds - securities issued in exchange for distressed commercial bank debt - and eurobonds posted aimilarly sharp losses, but long-dated global bonds fared worst, traders said.

For example, Mexico's global bond due 2026 fell by nearly 7 points, its yield spread over US Treasuries widening by about 50 basis points to 340 points. In the Brady market, many bonds shed more than 3 points, with even Poland's discount bonds, which are usually very stable, slipping by

about a point. Profit-taking was triggered by last Wednesday's hawk- rates. Overall, however, ish testimony to US Congress by Federal Reserve chairman Alan Greenspan, gradual, given that inflation indicators in the US remain

in which he warned of possi-

ble pre-emptive policy tight ening. Bearish sentiment was exacerbated by the threat of Mexico's decertification by the US government over co-operation in the war on drugs, which, if implemented, could lead to economic sanctions

INTERMATIONAL BONDS By Conner Middelmenn

J.P. Morgan's Emerging Market Bond Index, quoted on a spread basis over US Treasuries, widened to 450 basis points on Friday, from 390 points on Wednesday, before Mr Greenspan's speech J.P. Morgan expects that spread to narrow to 350 points by year-end, assuming e 75 basis point increase in US interest rates by the Fed over 1997.

However, even when US rates do rise, most observers said they did not expect a re-run of the emerging market bloodbath of 1994, when the bull run of 1993 screeched to a halt after the Fed's surprise decision to raise rates. Investors - many of them short-term players who had piled into the highyielding assets quickly pulled out of the emerging markets, leaving them to fall sharply.

"I don't expect to see a repeat of 1994," said Mr Peter West, economic adviser at West Merchant Bank. "Even if US rates rise. they won't do so to the same extent as in 1994, when the Fed Funds rate was raised six times from 3 to 6 per

He does warn, however, that the eventual tightening may initially spark a negative reaction, with dealers fearing more than a preemptive tweaking of interest most observers expect US interest rate tightening to be

0.50 0.50 0.56 7/8 5.20 5.67 6.39 3.16 3.25 6.55

moderate. Furthermore, Mr West says, "the regional credit story is much stronger now than it was in 1994". Indeed, economists are predicting strong growth in most emerging economies for 1997; inflation pressures in many countries are easing, budget delicits are coming under control, and the

political situation is much

more stable, forthcoming

elections in Argentina and Mexico notwithstanding. Investors have also changed. While the 1993 emerging-market boom attracted a lot of speculative of the way, emerging market players, many investors are now more knowledgeable ebout these markets end committed for the long haul. attracted not just by the julcy yield pick-up these assets offer, but also by their

fundamentals. yield went to 8 per cent, and I expect that we'll see we'd still have very good investment arguments for emerging market debt versus other major asset clas- or so, subject to develop-

positive underlying credit.

Following last week's self-off, the combination widening yield spreads and a ... damental story means that "circumstances are building for bargains to be had - the only question is when is the right time to get back in? said Mr Richard Gray emerging markets economic et Bank of America.

He predicts more volatile trading over the next few weeks until the Fed's next Open Market Committee meeting in late March. Once the dreaded rate rise is out bonds could resume their upward trajectory, he says.

Others expect the market to rebound more quickly "Over the last few months, s lot of investors have been looking to buy emerging market bonds on dips," says Mr Booth at ANZ, "This is "Even if the US long bond an excellent opportunity some good buying Itodayl."

He predicts a full correction of the sell-off in a week ses." says Mr Booth at ANZ ments on the US long bond.

Philips Electronics N.V. (The Netherlands)

Notice convening the ORDINARY GENERAL MEETING OF SHAREHOLDERS

to be held on Friday, March 21, 1997, at 2 p.m., in the AMSTERDAM RAI, EUROPAPLEIN, AMSTERDAM.

The items on the agenda are as follows:

- 2. Financial statements and Annual Report 1996. Report on the activities of the Phillips group in 1996.
 - Report of the Supervisory Board on the financial statements for 1996. - Adoption of the 1996 financial statements.
- Decision to make a distribution in cash to shareholders.
- 4. Composition of the Board of Management.
- 5. Composition of the Supervisory Board.
- Designation of the Board of Management as the body authorised for a period of 18 months to issue shares or rights to shares and to restrict or exclude the pre-emption right.
- Authorisation of the Board of Management for a period of 18 months to acquire shares in the Company.
- 8. Any other business
- 9. Closing.

The complete agenda and the Annual Report Philips 1996 have been deposited for inspection and are available free of charge at the office of the Company (Philips Investor Relations, Building VOp, P.O. Box 218, 5600 MD Endhoven), and at the head offices of the banks listed below.

Persuant to the Articles of Association, the binding proposals for nominations, together with information relating to the nominees, have been deposited for inspection and are available free of charge at the office of the Company (Philips Investor Relations) and at ABN AMRO Bank N.V., Herengracht 595, in Amsterdam.

Holders of shares Phillips Electronics to bearer (in CF form) listed on the London Stock Exchange who wish to attend the meeting, either in person or by proxy, should order their own depositary bank not later than 12.00 hours at noon on March 17, 1997 to block such certificates in exchange for a receipt from their bank that will entitle the holder to admittance to the meeting. Depositary agents must notify the Company not later than March 17, 1997.

Banks appointed as coordinating agents between depositaries and the

CONTRACTS & TENDERS

PETROLEO BRASILEIRO S.A. PETROBRAS

Bolivia-Brazil Gas Pipeline INTERNATIONAL COMPETITIVE BIDDING

CONSTRUCTION AND ASSEMBLY OF THE SPECIAL CROSSINGS BID Nº 578-9-012-97

Petróleo Brasiteiro S.A. - PETROBRAS, ehall contract through the bidding documents no 578-9-012-97 the construction and assembly of the special crossings portion of a pipeline from Santa Cruz de La Sierra, Bolivia, to Porto Alegre - RS, Brazil.

The Brazilian Government has requested financing from the interamerican Development Bank (IDB) and the International Bank for Reconstruction and Development (IRDB) for this project. Eldding will be conducted through the International competitive bidding policies and procedures of the IDS and is open to all bidders from eligible countries as defined in these guidelines.

As of today, PETROBRAS will make bidding documents available to prospective eligible bidders for the construction and assembly of the above mentioned special crossings Interested eligible bidders may obtain further information and inspect

the bidding documents at the following addresses: BRAZIL: PETRÔLEO BRASILEIRO S.A. SEGEN/GASBOL

Ruz General Canabarro, 500 - 6º andar Rio de Janeiro - Brazil Fax: 55-21-566-5723 / 5299 BOLIVIA: PETROBRAS BOLIVIA S.A. 3er Anilio entre Av. Piral y Av. Grigotà. Complejo Diamond Shamrock

The interested bidders may, through a written request to PETROBRAS, purchase a set of the bidding documents upon a payment of a non refundable fee equivalent to US\$ 1,500 (One thousand five hundred United States dollars). It will not be necessary to be present to receive a complete set of the hidding documents, whereas these can be sent

Santa Cruz de La Sierra - Bolivia

Sids must be delivered to the above address in Brazil, on or before April 21, 1997, 12:00 am, local time, and must be accompanied by a bid bond of 2.0% of the bid amount. It will not be necessary to submit bids in person; however, if sent by mail, PETROBRAS does not hold responsability for not receiving them on or before the time and date specified for reception of bids. Late bids will be rejected and returned

unopered.

Bids will be opened in public opening act, in the presence of bidders representatives who choose to attend, on April 21, 1997, at 03:00 pm, local time, at the above Brazilian address already mentioned.

MONDAY

Russia hosts EU talks

Boris Yeltsin, the Russian president, hosts an EU-Russia summit in Moscow. Bilateral trade, EU plans to expand membership to central Europe, organised crime, and Russia's need to prepare for membership of the World Trade Organisation will be the main discussion topics. Wim Kok, the Dutch prime minister, and Jacques Santer, the president of the European Commission, will represent the EU at the summit, which was postponed last month because of Mr Yeltsin's recuperation from heart surgery.

Arafat in Washington

Yasser Arafat, the president of the Palestinian Authority, meets Bill Clinton, the US president, and Madeleine Albright, the US secretary of state, in Washington. Mr Arafat's visit follows Israel's decision to build a Jewish settlement closing the last corridor through which the Palestinian-claimed east of Jerusalem could be linked to the West Bank. The decision has provoked warnings that it could derail the peace process.

Greece debates Cyprus

Greek Cypriot and Greek politicians hold a brainstorming session on Cyprus's bid to join the EU and on policy towards Turkey. Both are under EU pressure to include the divided island's Turkish Cypriot community in accession negotiations. Greece and Turkey have already exchanged threats to veto EU and Nato expansion, while tension is high over a Greek Cypriot plan to import missiles to counter the Turkish military presence.

should focus on catching top drug traffickers instead of allowing law enforcement systems to be clogged up by the petty

Governments

offenders, according to a UN study. The Vienna-based International Narcotics Control Board, in its annual report, says the "worldwide drug abuse epidemic" has overwhelmed many law enforcement systems while drugrelated corruption and intimidation threatens the integrity of politicians and public servants, It also wants drug trafficking to be subject to the UN's proposed international criminal court.

ON THEIR MARKS: the opening of the Formula One grand prix seeson marks the start of a tyre war between Goodyear and Bridgestons

ministers from Belgium, Ireland, Italy, Luxembourg and Spain at a summit of the European People's Party (EPP) in Brussels. The leaders of the Christian Democrat EPP, which after the Socialist group is the second biggest of the European Parliament's eight political divisions, will discuss how to wrap up the Maastricht treaty review conference by mid-June and how to plan enlargement of the EU to central and eastern Europe.

Asian grouping convenes

The Six Markets Group or Asian G-6 -Australia, China, Hong Kong, Japan, Singapore and the US - convenes for the first time in Tokyo to discuss stability in financial markets and exchange rates, Hiroshi Mitsuzuka, ths Japanese finance minister, says that if the participants meet regularly - the forum could be upgraded to "an Asian version of the Group of Seven" leading industrial countries, with meetings of the finance ministers and central bank governors, Initially, the grouping will confine itself to macro-economic

Peace push for Korea

North Korea is to sttend a New York briefing with the US and South Korea on proposed four-party peace talks for the Korean peninsula. It will be the

first time the two Koreas have had official contacts in nearly three years. Washington and Seoul will try to persuade North Korea to join the peace talks, along with China. The US has suggested it would provide food aid and ease trade sanctions if Pyongyang agreed to participate in the talks. which are meant to bring a formal end to the 1950-1953 Korean war.

Lee seeks greater powers Taiwan's president, Lee Teng-hui, will meet with members of the national

assembly to discuss constitutional reforms. Among the more controversial is the shrinking of the operations of the provincial government and the granting to the president of powers to dismiss the national legislature.

THURSDAY

French civil servants strike Civil servants in France are set for a

one-day strike in protest at a pay offer. Unions have demanded 4.4 per cent. but the civil service ministry says it expects the 1997 public sector pay bill to increase by just under 2.2 per cent. The government, which has refused unions' demands for "compensation" for last year's wage freeze, is determined to hold the lins in order to contain the overall public deficit to ensure France qualifies for European monetary union. The move comes at

the end of a winter of strikes, although the chaos caused by those of late 1995 has largely been avoided.

WTO reviews China entry

Negotiations on China's admission to the World Trade Organisation are reviewed in Geneva by the WTO's working party charged with drafting the terms of entry. China has signalled that it may be preparing some important concessions in order to speed the decade-old talks. WTO members say they may give China time to phase in some fair-trade rules but want more immediate market access for their imports. At the same time, s marked thaw in US-China relations has raised hopes for completion of the negotiations later this year.

Speech hurdle for Yeltsin

Boris Yeltsin. the Russian president, delivers the annual state of the union address to parliament, His first live speech since his

inauguration last August, it will be viewed as an important test of whether he is healthy enough to govern following open heart surgery. It also comes amid mounting speculation of a cabinet reshuffle. The speech, say some media reports, will deal with the centralisation of budget accounts.

Indian Ocean Rim links up Ministers from 14 countries bordering the Indian Ocean meet in Mauritius for

the inaugural session of the Indian Ocean Rim Association for Regional Co-operation. The forum aspires to build multilateral ties for collective bargaining with the developed world However, delegates must first decide whether to limit membership to developing countries. France is already seeking membership. Pakistan could be excluded because of its dispute with India, which co-founded the grouping. Finding common ground could be hard.

Sajeroom

One of the most specialist collections coins ever likely to reach the market, the John J Slocum collection of coins of

the Crusades, comes under the hammer at Sothehv's in London (to Mar 7), Slocum, a US diplomat in the Middle East; acquired many rarities – especially coins minted by the grand masters of the Order of St John on Rhodes, which carry estimates up to £5,000. Most of the coins are expected to sell for under £300.

Chinese warships visit US

Chinese naval destroyers arrive at Pearl Harbour, Hawaii, for the opening leg of a US visit during which they will become the first Chinese warships to visit the US mainland. A sign of recently improved Sino-US ties, their voyage was announced just one day after the death of Chinese paramount leader Deng Xiaoping. The destroyers Harbin and Zhuhai will reach San Diego on March 21. They are expected to proceed to Mexico, Peru and Chile.

Motor racing

The Formula One grand prix motor racing carousel starts again, opening in Melbourne with more team debuts and reshuffled driver line ups than usual plus the first Formula One Goodyear/ Bridgestone tyre war. Former world champion Jackie Stewart's all-new Ford-backed team will attract much interest, as will Arrows, which is under the new ownership of fellow Scot Tom Walkinshaw and boasts the reigning. world champion, Damon Hill, sacked by Williams-Renault. The favourities are Canadian Jacques Villeneuve (Williams-Renault) at 5-6 on, and Michael Schumacher (Ferrari) at 7-2.

Sumo wrestling

The 15 day spring grand sumo tournament opens in Osaka, Japan. Wakanohana will be hoping to join his brother. Takanohana.

4/6

and the Hawahan, Akebono, at the pinnacle of the sport's hierarchy. They would be the first brothers ranked yokozona simultaneously. Meanwhile, Daver Bathayal, a Mongollan and the first non-Hawatian to ascend to the fourth highest rank of *komisube* is fighting under the name Kynkushuzan. Raised with little concept of money, let alone technology, when he was Japan he believed drink vending machines responded to bows. .

SOME SEE SENIOR CITIZENS. WE SEE A BOOM IN CONDO CONSTRUCTION, NEW BUSINESS START-UPS AND INCREASED DEMAND FOR THE GOLF CHANNEL.

The demographics in many parts of the world are changing rapidly.

And along with those changes come unexpected risks and opportunities for all kinds of industries. Fortunately, AIG is a business partner with expertise in managing total marketplace risk.

We specialize in designing the kinds of custom coverages that corporations must have to cope successfully with emerging conditions.

Whether your company is actively meeting the demands of aging baby

boomers or is a business likely to be affected by shifts in population, AIG has the insurance and financial services you'll need.

Services like contractors' liability insurance, asset management and even satellite interruption coverage. And we've got the top financial ratings to back us up. So when you're ready to deal with change, we'll be willing and able. **WORLD LEADERS IN INSURANCE AND FINANCIAL SERVICES**

Commentary · Winston Fletcher

Why researchers are so jittery

ith a general election looming. Britain's market research wizards are on tenterhooks. The latest issue of the UK's Market Research Society magazine is titled: "1997: Year of decision for MR", and the lead article starts by asking whether 1997 will be a year of "further embarrassment". The second article is titled: "Laying the ghost of the nightmare of '92", a reference to the way UK opinion polls were all at sea with their predictions of the 1992 UK election result.

Having celebrated their society's 50th hirthday last year with much braggadocio, researchers now have a bangover. This being election year, the opinion polls are on trial again, and if researchers get things - which hardly seems possible, but then it did not seem possible last time their credibility will be in smithereens.

Inevitably, the entire market research business will be seen as guilty by association, and market research is now pretty big business. With £7bn in turnover and steady, compound growth of 8-10 per cent a year, the UK research business has done extremely well of late. Moreover, the Association of Market Survey Organisations (Amso) forecasts growth of 15-20 per cent this year.

Research is a nice little export earner, too. As with other marketing activities, Britain is a world leader. According to Amso, about 20 per cent of UK market research turnover comes from international surveys, and international work is growing faster than

Today there are few manufacturing companies, media houses, government departments, public bodies, academic institutions or even retailers in Britain which do not integrate research into their decision-making procesees. For many years, retailers were market research Cinderellas. They believed they could learn from their store traffic everything they wanted to know. As a result, they felt they did not need to ask any questions. But retailers now account for some 5 per cent of total research expendi-

ture, and their share is growing steadily. However, not everything is rosy. Though other market researchers strive to distance themselves from the political pollsters, they know they share their problems, and many of those problems are fundamental. On one hand, some members of the public manifestly enjoy taking part in research surveys and focus groups. The paid interviewers know who they are, and return to them again and again. This leads to bogus results.

On the other hand, more people are hecoming refuseniks. in Britain the industry now conducts well over 15m interviews per year, and 100m questionnaires are mailed out by database companies. Although there are no published figures, most experienced researchers will confirm that refusal rates

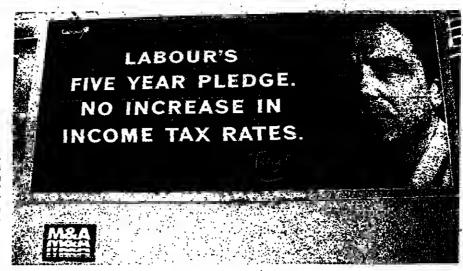

are rising steadily.

Even in flagship studies like the National Readership Survey, response rates are now just over 60 per cent after eight or more calls on respondents. (When the survey started in 1954 they reached 85 per cent after six calls). So 40 per cent of the NRS universe is nowadays uncanvassed. Political polls suffer similarly high non-response rates, which was

one of the reasons for the 1992 debacle. More worrying, a welter of evidence shows that a growing proportion of the public is now playing games with market researchers. They understand the processes (which are hardly rocket science) and consciously manipulate their responses. Like voters in by-elections, they deliberately send messages to companies and political parties, using the researchers as conduits. It takes only a small percentage of such respondents to invalidate results.

None too soon, the research industry has started to investigate these problems. Several of the key papers at last month'e Amso annual conference addressed the increasingly uncertain relationship between market researchers and their raw material - the

It is by no means clear what, if anything, can be done, and that is why so much hangs

Market research is a far more potent influence in modern politics than advertising

on the election pollsters' accuracy this time round. Polls capture the headlines. Polls have also captured politicians. Nobody pays more attention to surveys than politicians. Contrary to conventional wisdom, market research is a far more potent influence in modern politics than advertising. Politicians read, mark, learn and inwardly digest the voters' views on everything from abortion to traffic crossings. And the pollsters revel in

their influence. Behind The Oval Office, the new sell-andtell pot-boiler by President Bill Clinton's exchief electoral strategist, Dick Morris, shows Clinton messily awash with market research findings in the run-up to last year's election. Indeed, Clinton often felt himself drowning

The pollsters tried to control his every waking moment. They told him to become a father figure with a powerful red tie and dictated bow he should spend his holidays. "Can I golf?" the president asked the pollsters, his tone dripping sarcasm. "Maybe if I wear a baseball cap?" He was told: "No, sir, go rafting".

In compensation, market research has given political leaders, both in western and ex-communist democracies, new power over their parties. In Britain, former prime minister Margaret Thatcher was able to march on with confidence during the Falklands war because she tracked public opinion throughout, Neil Kinnock, the former Labour leader.

was able to defeat Militant extremists because he knew that the vast majority of the electorate, and the vast majority of Labour voters, supported him.

ignore them with insouciance.

The politicians influence a great deal of business, both directly, via government departments, and indirectly, via publicity and the

1992 was not their only cock-up. They also bombed in 1970. And in the 13 elections between 1945 and 1987, some 40 per cent of pollsters' forecasts were inaccurate by more than plus or minus 2 per cent - a small margin, but usually sufficient to swing the result, which is all that matters.

Most of the time the researchers' findings cannot be verified. They cannot be proved right or wrong. Except at elections. That is why market researchers are now so jumpy. Their outlook is far from bleak, but it is

The ability of the present Labour leader, Tony Blair, to rida roughshod over Labour's historic articles of faith has, again, been

built on firmly researched foundations. When zealous and partisan supporters claim "the party'll never buy that", the leader, research data in hip-pocket, can nowadays All of this emphasises the present symbiosis between market research and politics. It will last as long as the politicians continue to have faith in the researchers' wizardry.

So the researchers wait - and worry -

Toyota Picnic Emperor's bare wheels

ity the poor direc-tors at Toyota. The UK : market for people carriers is booming, and after painful months on the drawing board an acceptable design compromise has been reached: the management has sanctioned a renewed commitment to advertising hudgets and then, with much fanfare, the new name is unvelled - the

Picnic. Now, we all know that design companies and other such consultancies are paid fortunes to come up with jazzy new corporate identities or brilliant new product

Many readers will have sat around a boardroom teble nodding at designers as they post-rationalised the strategy behind a new squiggle or name. And readers may have looked sheepishly at colleagues, praying that they would he the first to say aloud what everyone was thinking: "The emperor has no clothes!"

Sadly, no-one at Toyota. had the nerve, and Saatchi create a launch, advertising campaign for the Picnic, so as to take on rival brands such as Ford's Galaxy and

Renault e Espace. Two funny commercials feature a young only-child who hears with considerable trepidation that her parents' new Toyote Picnic is spacious enough to hold three

more children.

Horrified, the child sets out to thwart her parents' attempts to conceive. In the first ad she sets off the Picnic's alarm again and again. Each time her parents leap out of bed.

In the second ad she ruins a romantic meal by sending a mouse across the dining room floor and, later, turns up like a bad dream in their bedroom doorway, claiming "teddy's scared". The last shot sees her anuggled up between her frustrated mother and father.

The ads mark a big leap forward in nerve for Toyota, a very cautious advertiser. which has been putting some £20m a year behind its "The car in front" strategy money largely wasted on anodyne and anonymous

The latest ads are refreshing and far from anonymous. But there are things about them that do not seem to add up.

For example, suburbanites sed with keeping up with the Joneses are the target market. Yet they would hardly invite the neighbours and Sastchi was asked to to take a spin in their spanking new Picnic

And at between 215,000 and £20,000, the Picnic is too expensive to have a joke name. Presumably Ford and Renault are enjoying a chuckle at Toyota's expense.

Eisner's princely ways cut no ice with shareholders

Christopher Parkes feels a chill wind blowing across Anaheim Pond at Disney's AGM

The music, choreography tor . . . Hercules," boomed out annual meeting last week amply demonstrated the company's command of stagecraft. But when it was time for audience participation, the masters of illusion revealed a less than adequate grasp of the arts of interactivity and crowd control.

After more than four hours, as the show dragged into its closing rate greatness and fulsome tribminutes. Michael Eisner, Dis- utes to the chairman's fellow ney's notoriously snappy group chairman, was still trapped stage.

Although most of the 10,000plus audience had grabbed their free passes and buzzed off to who saved lame duck Disney Disneyland, the willing suspension of disbelief had long since evaporated among the crowd's remnants. Why, Eisner was asked from the floor, was it so mg projected his beaming face Mr Nice Guy, Litvak, earlier prescold in here. "Because you're sitting on the ice," be snapped back.

Arranging seating on a thin carpet covering the rink of Anaheim Pond, home of Disney's Mighty Ducks hockey team, may have been a cunning ploy to keep the meeting brief. But while the passes to the neighbouring theme park had worked their magic on many, the freeze-out tactic was a flop among the die-hards.

In no uncertain terms, Eisner told his questioner he wanted "out of here". He had accepted the blame for the ill-starred, stellistic Hat short-lived, \$100m plus tenure as group president of his pal, Michael Ovitz. Shareholder concerns about Disney's lavish way with executive pay, and a proposal to reprimand the board by blocking he re-election of five members. had been debated and voted directors up for re-election, the 11 down. Official business was completed; there was nothing more to

Within minutes Eisner and his applause. executive princes were on the road back to their bunker in Burbank. The performance had started well enough with clips to come. Actor Robin Williams and a rollicking song from this mugged his way through a clip year's animated feature. "Who from Flubber, due out late this

we thought, wise."

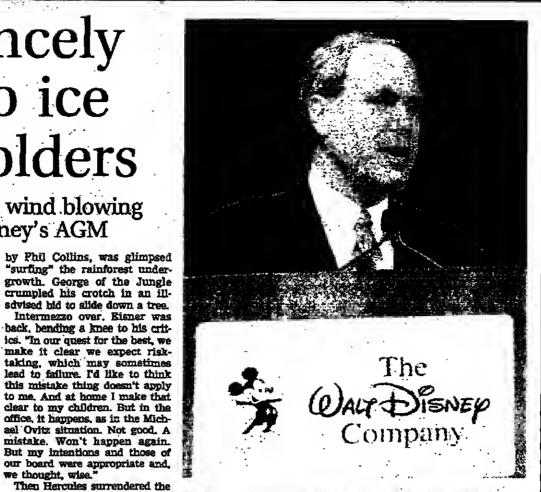

stage and the etable of King

Augeas to Sandy Litvak, chief of

corporate operations. No more

He earned an early round of boos when he tried to smother one cross questioner who had a series of questions on Risner's "\$400m" compensation package for 1997. A phalanx of eight security men gathered to hover close by. The grumblings grew.

Litvak calmed things down by summoning a colleague, armed

Risner: "I'd like to think this mistake thing doesn't apply to me"

ment based on the claim that Eis- he offered the meeting's second ner's \$750,000 annual basic pay apology.

was the lowest in entertainment. That got things moving around the arena exits, and the crowd was now thinning rapidly. But there were still enough to give a rousing cheer to the man who suggested lopping the Ovitz severance package off Eisner's pay. "To recognise failure is one thing, but to reward it is a mis-

take," came another voice. The small shareholders and company employees in the audience were having their day, catcalling at Litvak's stonewalling. More cheers followed for a man -You think you can railroad us with your rhetoric" - angered by

Disney was not a one-man company. An enormous number of department heads were disaffected and looking for other jobs: They have lost the spirit," he charged. Disney's attitude to constructive dissent was: "This is a great place to work and to hell

Litvak was quickly in trouble again over his cavalier way with selecting and brushing off questioners. Faced with a charge of arrogant disregard of questioners' concerns, and bombarded

Eisner returned to draw the remaining flak, promise brighter lights in the Pirates of the Caribbean ride, and crack his ice joke. But the atmosphere was irreparahly chilled. In contrast to Disney's experiences in the consumer marketplace, many in the crowd left cold, hungry and dissatisfied.

The chairman ultimately carried the day. But while he persuaded the audience to "move on" from the Ovitz farrago, he appeared simultaneously to sharpen the scrutiny of his own pay arrangements.

In an environment where boards rontinely garner overwhelming support from sharebolders, the 8 per cent of the votes cast against his package and the 13 per cent withheld from the directors up for re-election constituted an unusually strong rebuke.

As the wider debate over top-level pay in the US heats up, Eisner and his cast members were left with more than enough incentive to earn the performance-related portion of their packages, polish up their AGM act - and find a warmer venue

Coke tries a curvy can

One of the few claims to fame of Terre Hant, Indiana, is that in 1916 it was the birthplace of Coca-Cola's contour bottle. Today, Coca-Cola plans to put Terre Hant hack nn the map as the hirthplace nf another revolution in packaging: the first-

chosen Terre Hant as nne of five US test markets for a curvaceous can that it hopes will boost sales by mimicking the popular shape of its famnus 'hnbhleskirt" bottle, one of the world's best-recognised icons.

Cans for food and other prodacts have come in various shapes and sizes over the years. hut Coca-Cola claims this is the first time a soft drink has been marketed in anything other than a conventional straightsided cylinder.

"We view cans as one of the ast bastions of non-differentiation when it comes to the mar-keting of noo-alcoholic beverages." says Frank Bifulcn, vice-president for marketing at Coca-Cola USA. "We felt we needed to probe that opportunity as a way for us to connect more strongly with the consumer and, at the end of the day, to sell more product."

Oddly, for all its longevity, the contour bottle came about by accident. It was invented by a Coca-Cula bottle manufacturer in Terre Hant who was searching for a design that would distinguish Coca-Cola from its imitators. The bottler looked up "coca" in the Encylopaedia Britannica and mistakenly took his cue from the finted contours of the totally murelated cocoa bean pod.

The bottle caught on because of its pleasing feel and shape, which matched the contours of the human grasp. The bosomy lines of the original design caused it to be known as the Mae West bottle for many years, but a slimmed-down ver sion was dubbed the hobbleskirt after women's fash ion of the time Today, the contour trade mark ranks almost as high in recognition

Cola logo. So. in the last few yeara, Cnce-Coia has been looking for ways of exploit ing its value by adopting it for nther cootain ers. In 1998 if

success by starting to sell Coke in a contoured, 20oz plastic bottle, a move that has subsequently delivered strong sales growth in the otherwise mature US market and elsewhere.

But about 50 per cent of all Coke sold in the US is canned, and executives have Inne pon dered bow to apply the contour shape to this market segment. The main obstacle was technological: bow to overcome the problems of filling, shipping and stacking an irregularly shaped, and therefore structurally weaker, container.

By 1994, Coca-Cola had devel oped an experimental can made of steel, and showed it to con sumers in Germany. After getting an enthusiastic response, it moved ahead and developed today's aluminium version, with the help of the Chicagobased American National Can.

Coca-Cola's Frank Bifulco says the can is "just another tactile as well as visual cue to consumers to tell them that Coca-Cola is different, better and special". It starts, he says with what you see on the shelf and what you feel in your hands, before the product even reaches your throat.

This seems to confirm what many have always said: that the mystique of Coca-Cola bas little to do with how the stuff tastes. But one question that will have to be established by test marketing is whether people are prepared to pay more for a funny-shaped can than for the regular article, since it costs more to produce.

A sticky end for stamps?

up to date with the latest technology. Not only can Americans buy stamps from aptomated teller machines (ATMs).

be recycled by wiping off the postmark." with a damp cloth.

America's self-adhesive stamps are a justify huying a postage franking machine, but too large to employ someone in lick stamps one by one. Yet E-Stamp, a technology company inunded by a refrigeration engineer better ways to bring the benefits of

tomers found that used stamps could

franking machines to small businesses. Like most truly original ideas, the concept behind E-Stamp seems almost obvious once you have heard it. It is and stamping in one step. E-Trade has this: to use a personal computer and a printer to issue and print stamps, and to use the internet to allow users to prepay online for their franked mail. This approach saves customers money. because it makes use of existing equipment instead of requiring the purchase

of a special dedicated machine. It is also more convenient, because it personal visit to the post office to prepay the postage, as most owners of franking machines do today. The system takes advantage of a new technology specification published by the US Postal Service called the Information Based Indicia. This is essentially a two-dimensional bar-code which includes the address not only of the per cent on the face value.)

To most people, the US recipient but also the sender, and Postal Service may seem includes details on the account holder which help to reduce postal fraud.

Salim Kara, the founder of E-Stamp, holds two petents which will give his company a strong position in the new market that develops. One is an "elec-The USPS is also one of tronic vault" that the company claims the few post offices in: will protect users of its services from the world to have licked the technical; having their prepaid postage either sto-problems of self-adhesive stamps. I see from their PCs or lost forever in the Britain's Royal Mail, by comparison, asvent of a hardware crash. The other is is relaunching self-stick stamps on a new design of envelope, containing a trial basis this month, two years after a special second window allowing the disastrous first attempt in which sus bercode showing that the sender has paid for the postage to be printed on the letter itself.

The envelope design alone could be worth millions of dollars a year to comboon to businesses that are too small to panies, because it removes one printing step from the mailing process. Traditionally, mass mailers have had to choose between printing the indicia (the sign proving prepayment) on the envelope and printing it on a stick-on born in Tanzania, is working on far label. For more complex mailings, the company has developed a way of connecting a \$50 electronic scale to the serial port of a personal computer, so that the user can integrate weighing trademarked a protocol that allows computers to talk to postage scales, which is the mailing equivalent of Microsoft's Telephony Applications Programming Interface. E-Stamp calls it Postage Applications Programming Interface; Papi would be more catchy.

Sunir Kapoor, a veteran manager from Oracle and Microsoft brought in saves the user from having to make a as E-Stamp's chief operating officer, refuses to specify exactly how the company proposes to make money. Butthere are clearly two possible routes: one is to sall the software and the weighing machines; the other is to earn commissions from prepaid postage sold over the Net. (Retailers of stamps in the US often charge a commission of 10

At first sight, the small office/home office market may not sound large enough to justify the effort. But Kapoor believes the opportunity is immense. He points out that there are I.2m franking machines in the US, but 25m personal computers were sold last year and over 9m machines connected to the Internet are in use by small businesses.

Stamps account for \$11hn of the US Postal Service'e \$54bn annual postage revenues, and Kapoor believes that the greatest part of this \$11hn comes from small businesses sending mail rather than people sending birthday cards to their grannies. If we could divert just per cent of that market," he says,

we'd do very nicely." The E-Stamp idea ts brilliant. With a beta testing programme about to begin I fully expect the company to deliver on its promise to offer a commercial product in the second half of 1997.

But the husiness does raise an alarm ing question. In the long term, the use of two-dimensional bar-codes is certain to make the US Postal Service more efficient, not only cutting down fraud but making it easier to track letters and packages as they make their way through the system, and providing a proof of delivery that is currently one of the key selling points of private courier services like FedEx.

Where does this leave old-fashioned stamps, however? Although the Post Office will no doubt continue to offer traditional stamps, self-adhesive or not. it is obvious that it will cost more to carry standard stamped mail than mail bearing the new barcodes. The downside, therefore, is that stamp prices in the long term must rise, and the range of colourful commemoratives that make mail such a pleasure to send and receive may become a thing of the past. Start collecting stamps now, while you still have the chance.

Alumni from the Insead class of 1968 talk to Della Bradshaw

Rewards of revolution

f Galia, the French representative on when we were very unhappy with one replaced," remembers Helène Ploix.

For Plots, there were battles to fight before even starting the course: Eager But for many, particularly the major: to become a consultant, she was detery of insead students who were not mined to get a place at insead, but the rench, the intensity of the MBA school had previously not admitted that of spectator rather than particle in a local monastery. In 1967 the new ant, particularly as in May that year campus was opened and so the first ley were sitting their final exams. women were allowed in: two graduated And there were further distractions, in 1968 out of a student body of 150. We had our own revolt in January . Plotr's ambitions were realised. On

graduation she went to work for McKinsey in Paris. "T'd never have been hired by McKinsey if I hadn't been to Insead," she believes. After running a bank and advising French prime minister Laurent Fabius on economic and financial affairs, Ploix has come full circle and is now special edviser to KPMG Peat Marwick on the issue of European monetary union.

As with all MBA classes, Insead's alumni recall the hard work. But they remember the class's international ties represented the class was "a very rich melting pot", says François Vachey who has worked for L'Oréal since graduation, now as vice-president. Nearly 30 years on, Vachey says he chose to go to Insead because it was "the business school that was open to

For Ploix the real international feel came through in the evening study groups of a dozen or so students. "Each group had to discuss a case for the next day. The different nationalities and

For Horst Grosspeter, managing director of his family company Quarzwerke, the decision to go to Insead was directly linked to his company's need to expand outside Germany. Today the industrial minerals company is number one in its field in the US. Moerk, a Norwegian who completed his undergraduate degree et Birming-ham University in the UK, cites the

graduation trip to the US as an indicator of the respect with which Insead was beld internationally.

One bundred or so of the class char-

tered a plane and flew to Chicago. They took buses to big companies and stayed with US families. And they were presented with their MBA diplomas in New York by David Rockerfeller at the top of the Chase Manhattan building.

"Today everybody travels for every-thing," explains Woerk. "But for us, then, that was very special." Moerk worked in Europe, the US, Singapore and China before joining Royal Ahold nearly three years ago in the Netherlands as the corporate executive

The choice of employer reflected the European aspirations of the course participants. Four graduates joined CPC Europe, the consumer food company responsible for the Knorr brand. Two are still there, including Simon, who is now senior vice-president of CPC Europe and was offered his first job with the company on that fateful spring day in Brussels.

The other is Angelo Abdela, vicepresident of strategic and capital investments at CPC International in New York, working on strategies and acquisitions. "CPC was recruiting for Europe from its European headquarters in Brussels at the time," says Abdela. "It was the first company to take that kind of pan-European approach, which suited the Insead graduates."

Most graduates got six or seven job offers, says Yves Bobillier, who also accepted a job with CPC. A year later -"I wasn't swimming in my water" -Bobillier dacided to contact Dow, which had also offered him a job on graduation. He has stayed with them ever since and today is president of Dow Europe in Switzerland.

An agronomist by training Bobillier's perspectives were changed by Insead. "Insead convinced me that even having an engineering background I had the

INSEAD

The INSEAD-ISDA **Swaps and Derivatives Programme** 11-23 May 1997

Previous participants describe the experience with comments such as:

"Comprehensive programme: covering a wide variety of related topics in a relatively short period of time"

"Complete overview of derivative instruments. Well balanced mix of theoretical and practical topics"

The INSEAD-ISDA Swaps and Derivatives Programme is a two-week hands-on course designed specifically for professionals who already have a sound basic understanding of derivatives.

The programme benefits from more than twenty years of fundamental and applied research on international financial markets, with a particular emphasis on derivative instruments.

Led by an international faculty, the programme includes the highly praised ALCO challenge, a bank simulation exercise which allows participants to integrate the links between product profitability, risk, capital adequacy and other regulatory issues.

Some of the major banks that have sent participants over the last two years include ABN AMRO, Barclays De Zoete Wedd, Chemical Bank, Crédit Suisse, Deutsche Bank, Dresdner Bank, First National Bank of Chicago, Industrial Bank of Japan, ING, Swiss Bank Corp, Westpac Banking Corp.

had three essential elements. The first element was corporate employment policy. which said that as companies did better, their workers should as well. Wages should rise as should employer-provided health and pension benefits, and jobs should be reasonably secure.

This element reinforced by the trade unions, to which about 35 per cent of the private-sector workforce belonged by the mid-1950s. But it was enforced in the first instance by public expectations. We were all in it together, and as a result grew together. It would be unseemly if a company with increasing profits failed to share its prosperity with its employees. The second element was

social insurance through Societies are tied together which Americans pooled their resources against the risk that any single person through illness or bad luck might become impoverished. The US social insurance system was never as comprebensive as those developed in most of western Europe, but it provided the bare essentials: unemployment insurance for those temporarily out of work; social security for the elderly and

disabled; a minimum income for families with a single, johless parent: health care for the elderly and very poor (Medicare and Medicaid).

The third element was the promise of a good education. In the 1950s, America's collective conscience, embodied in a Supreme Court decision, finally led us to resolve that all children, regardless of race, must have the same

grade was also reaching an continuing. But what has ever-larger portion of the made such factors so powerpopulation. The GI Bill had ful has been the breakdown made college a reality for in the past 15 years of all well over 1m veterans three elements of the social rsturning from the second compact. world war. Others gained access to sdvanced education through a vast emansion of state-subsidised pubuniversities and community colleges.

It is important for Europeans to understand what the US social compact was and what it was not. It defined the American sense sizing" and "down-waging" of fair play, but it was not might be called "downabout redistributing wealth. merely proclaimed that as a rapidly declining for lowersociety we depended on one another. The economy could not prosper unless vast numbers of employees had more fits altogether. Occupational about

money; none of us could be economically secure unless we pooled risks; s better educated workforce was in all

The marked widening of economic inequality that started in the late 1970s is attributable to several factors, including the rapid advance of information technology and the increasing integration of global finance educational opportunities. and trade cited by those who Schooling beyond 12th are resigned to the trends and trade cited by those who

> rofitable US companies now routinely downsize. As the Bureau of Labor Statistics has shown, redundancies at present are running at a higher rate than in the expansion of the 1980s.

The corollary to "downbout redistributing wealth. henefitting". Employer-immigrants, he will face America's social compact provided health benefits are strong opposition in Conwage workers, who are ment insurance now covers required to make bigger con- a smaller proportion of tributions or are losing bene- workers than 20 years ago -

pension schemes offering defined benefits are giving way to plans that guarantee no level of retirement income - without employer

contributions. Yet top executives and their families receive ever more generous health benefits and their pension benefits are soaring in the form of compensation deferred until retirement. And although they have no grester job security than others, it is not uncommon for today's top executives to receive "golden parachutes" when they lose their jobs. The second element -

social insurance - is also breaking down. The poor and near poor bave been asked to hear the largest burden in balancing the federal budget, with the largest cuts to their programmes.

Although the president has said he intends to rectify this, particularly the reduction in food stamps for the working poor and the elimination of benefits for legal gress. Meanwhile, unemployger face the common of Depression, but water cold war, and no long dependence. Perhaps is to also true that in the globa; ecotions, we no justes are at dependent on one another.

Or perhaps it may have to do with the fact that wealth ier Americans are no longer under a "veil of ignorance" about their likely futures and those of their children to use the felicitous phrase of John Rawls, the philoso niter. They know any sper compact is likely to require from them contributions exceeding their benefits.

As America congratulate itself, justifiably, for renewed economic growth and a diminished deficit, it is important to recognise the growing menace which widening inequality poses to this and any other society. The trends toward technic logical advances and globall sation cannot be reversed and nor should we aspire to reverse them.

ut we need not blindly accept their social · quences. The fed eral hudget should not be halanced so that the poor in society hear the large sacrifices. Social insuran such as Medicare and soci security should not be receganised in a way that encourages the wealthier and healthier members of society to withdraw resources.

On the contrary, the wealthicr should be expected to contribute more than the less wealthy toward restoring the solvency of these trust funds, which are in danger of becoming depleted Good schools, universitie and opportunities for contin uous learning must be available to all.

There is much to celebrate about America. The future is underlying moral question; which is also a political one It is the same question faced by many nations. Are we, or Young people from families are we not, still in this together?

Takeover strategy risks destroying value

Sir, Lex argues ("Valuing takeovers" February 21) that judging the merits of an acquisition by reference to whether or not earnings are enhanced in the short term is over-simplistic. This is beyond dispute. But in the stylised example is value

really being destroyed? The first comparison mads is between the immediate return on investment (5 per cent, representing incremen tal earnings as a proportion of total acquisition costs) and the acquirer's cost of capital (assumed to be 10 per cent per annum). Of course, to make a proper compari-

son with the cost of capital it the premium paid, including is cash flow rather than earnings measures that matter. We do not have the data to hand to make this assessment. But if the investment returns 5 per cent in cash terms in the first year and this is expected to grow on average by more than 5 per cent per annum, cost of capi-tal requirements will be satisfied. It is worth noting thet the market seems to be expecting earnings of the target company to grow reasonably rapidly, given the information provided on pre-

acquisition earnings and capitalisation. Lex goes on to compare anticipated restructuring costs, with synergy benefits. The fundamental question surely ought instead to be whether the acquisition makes overall financial sense in strategic terms and in terms of the risks and rewards associated with the total expenditure on acquisition and restructuring. Lex's final argument is

that a greater benefit to immediate earnings per share can be achieved through a share buy-back. This reflects the fact that the immediate earnings yield on the acquirer's shares exceeds both the immediate return

on the acquisition and the cost of borrowing. Surely here Lex is in danger of falling into the same trap of placing too much reliance on

The real issue will usuallybe the question of the longer term prospects for both the acquirer and target. If the opportunities are there, then It may be that it is the share, buy-back that is destroying value; precisely the reverse . of Lex's argument.

short-term earnings effects.

Reform necessary before enlarging EU

management of an enlarged

From Professor Franklin

Sir, Some of us in Brussels are puzzled by Ian Davidson's comments on the preparation of the future enlargemeets of the European Union ("Deafening silence": February 26). We agree that enlargement ... cannot fail to hring about far-reaching changes to the Union". But the comment "nobody responsible - neither the Commission nor the member word about these transformations" seems unfair. First, the Commission has

written some reports on this need of thorough reforms. Many member states don't care; this is another problem Furthermore, Belgium's position in the inter-governmental conference has always been based on the necessity of implementing far-reaching reforms in the Union before enlarging it. Without a generalisation of the Council, for example, the

Union of 25 member states will become simply impossihle. in such a context, the next enlargement will not stabilise the central and eastern European countries. It will only destabllise the European Union. We shall not fulfil our promises to the new members concerning the improvement of the economic, internal and external security. And the European

Some member states prefer to ignore this fact. This is dangerous. First, if the institutional reforms of the IGC are not deep enough, this will probably create difficulties in the ratification process (et least in some of the oldest member states). Second, if these reforms are not sufficient, it will become more difficult to make them adapt some European policies (agriculture, structura) funds and finances to begin with). In fact, each national veto that is maintained is

Union will become e pale copy of the United Netions.

going to become an additional stumbling block on the road to the enlargement Third, should the enlargement occur, it will become absolutely impossible to reform the institutions in the future.

This debate had been pre-

pared in Belgium for two years. I shall happily send to Mr Davidson a copy of the government's programme and the parliament's documents. I can even ask to have him invited for the next parliament's committee. He will see that there exists a general consensus sbout this (and, incidentally, such a thing as a civilised parliamentary debate about Europe - this will certainly be a shock).

Franklin Dehousse professor at the College of special representative of the Belgian minister of foreign affairs for the IGC, Rue des Quatre Bras 2. B-1000 Brussels, Belgium

be heeded From Mr Pieter Vlieland

Warning to

Sir. Your articles on amu are always a valuable source of unbiased information on this hig issue.

Apropos of which, it is worth recalling that only recently Mr Rolf Breuer, the influential head of the Deutsche Börse, pointed out that Frankfurt stands, and I quote, "a good chance of taking up a leading position in Europe should Great Britain not be part of the first group of Emu members."

This is a pretty stark warning that we in this country had better get our sct together over currency union if we wish to preserve our livelihoods - and our

Yugoslavia victim of double standard for IMF membership

From Mr Mike Finch.

Sir, You report that Milos evic's Yugoslavia cannot apply to rejoin the International Monetary Fund and World Bank pending democratisation and progress on resolving the status of the

minority Kosovo Albanians ("Serb banks teeter on edge of abyss". February 20). Would not the consistent application of the first criterion halve the membership of these two international organisations? Neighbouring

Croatia would also fall foul of the second criterion. Contrast Kosovo's mounting Albanian population with Croatia's clearance of the Krajina Serbs from what had been their "UN protected" ancestral lands.

What is astonishing is not the blatant double standard but that it goes unremarked.

> Mike Finch. 5 Fairways, Teddington, Middlesex TW11 9PL, UK

Out with the devil

Jackie Wullschlager on a mystery cycle for the 1990s

Britain, with fewer observant Christians than at any time in history - a recent survey showed the number of Anglican churchgoers at a record low of 1m, matched hy 1m Catholics, and between 1m and 3m Moslems. However, perhaps because our pre-millennial times are obsessed with origins of any sort - chaos theory, the formation of a human life – we are intellectual junkies wheo it comes to the roots of Christianity and the historical facts surrounding the life of Jesus.

I was brought up a committed atheist, and I remember my shock and outrage - why had no one told me? - when I came across the documentary evidence that Jesus had not only existed but had lived at Galilee in the first century A.D., had been a religious teacher, and had been executed by the Romans. Today, the story of Christianity's formative years is the stuff of popular television series like Mark Tully's recent The Lives of Jesus (2m viewers), of bestsellers such as Robert Eisenmann's The Dead Sea Scrolls Uncovered (300,000 copies) or AN Wilson's biography of Jesus (50,000 copies). This month both these authors have controversial naw books ont -Eisenmann's James the Brother of Jesus (Faher) and Wilson's biography of Paul (Sinclair-Stevenson) - while the theatre also enters the fray with a radical gious mystery plays The Creation and The Passion at the RSC's The Other Place, Stratford, opening

this week. "It was a big body blow," says RSC director Katie Mitchell, "to find that the gospel writers tried to hijack Judaism to service their own ends." Out of her mystery cycle go standard scenes like the Three Kings and the shepherds, for which there is no historical evidence. Out too are the Devil, Herod's slaughter of the innocents, and Jndas the betraver. "The entire Crucifixion story is 80 per cent built on the premise of a prophecy fulfilled, it's not purporting to tell events as they were," says dramaturge and bishop's son Edward Kemp. Ha became "fantastically angry with the gospel writers" for their inventions and inaccuracies -"why couldn't someone just write the truth about what Jesus did?" as he adapted the plays during rehearsals. "The text changed

every single day." What is left is a medieval drama for the 1990s. Each decade has its mystery play. Tony Harrison's Crucifizion, promen around the riverside terraces of

the new National Theatre, was a hippy version for the 1970s, Bill Bryden's folk-rock and audience participation Mysteries at the Cottesloe was an extrovert 1980s piece of theatrical experimentation. Unlike them, Mitchell's Creation and Passion favour intimacy and reflection, over pageantry and crowd scenes. In the 15th century, mystery cycles were performed by guild members on carts which paraded around a town: thus the promenading, participatory productions of the 1970s and 1980s.

But Mitchell uses the littleknown N-town cycle which is closer to continental passion plays such as Oberammergau, and suits the static setting of The Other Place, with a modern audience watching an iotense exchange on stage, So in The Pas-

The challenge on stage is to play this psychologically sophisticated character, Jesus, in whom we can all see ourselves, without losing the spiritual grandeur of the

medieval vision

sion, instead of Jesus as meamerising leader rallying the crowds, a series of dynamic, charged revisionist staging of the reli-interactions between Jesus and tual truth is for each individual various individuals - the rich to discover for himself. This is young man, a disciple, a Pharisee not far from AN Wilson's thesis - present Christ as a sort of of Paul as "the first of the great inspired 1990s shrink, helping romantic poets" who crystallised others find their own spiritual salvation bnt, in Freudian tradition, not giving direct answers. "Jesus brilliantly understood individual psychology, what triggers you press to get through to people," says Kemp. "He saw, for axample, that the rich young man has to get rid of everything if he is to achieve his paradise."

Mitchell sees "a direct line from Christianity to socialism" and wanted above all to avoid "shoring up Catholicism, anti-Semitism and sexism". She emphasises strong female roles -Mary Magdalene is a disciple not a prostitute - and chose the N-town cycle partly because it gives greater space to the women in the Bible. She is less interested in the good versus evil battle of a traditional mystery reading hence no Devil - than in an individual's spiritual dilemmas. Her Judas, for example, acts in collusion with a Jesus seeking an agent for his own sacrifice. "For Judas," says Kemp, "it's an act of love, like Abraham prepared to ford-upou-Avon, on March 7.

sacrifice his son - then he finds he can't handle it."

Where do these contemporary types leave the medieval plays? Paradoxically, we left them so far behind wa meet them coming the other way," says Kemp. There is a directness, a borderline between simplicity and simple-mindedness, which medieval and modern drama share. The stark, bold action and the flexibility of text - adapters pick and mix from different mystery cycles, York, Chester, N-town offers each age a model against which to work out its responses to the seminal stories of our culture, and are one reason why secular audieoces are repeatedly drawn to the mysteries. Like other influences from folk and primitive art, the mysteries lend themselves to the less text-based. more physical performance which has in the last 20 years hugely broadened the range of British theatrical experience.

Mitchell's RSC production of The Dybbuk, based on a Jewish myth, was a fine example of this style. Another is Nancy Meckler's adaptations of 19th-century novels such as The Mill on the Floss, which use a highly emotionally expressive form of acting to physicalise the secret thoughts of complex characters. Will this work in The Passion to draw out what Mark Tolly in Lives of Jesus called the "Hidden Jesus"?

Tully locates this figure in the riddles and paradoxes of the apocryphal gospel of Thomas, with their suggestion that spirithe idea of Jesus as an "inner light" and so founded Christianity. The heart of Kemp's Jesus. too, is "about taking responsibility for yourself"; Kemp's way into the mysteries was to "draw up a list of oppositions - altruism versus selfishness, responsibility versus irresponsibility, commnnity versus individualism . . . issues that were current to Jesus and still seem pretty current now'

If this sounds quasi-Buddhist, quasi-Blair, that is the price you pay for stripping a symbol down to historical fact and adding a layer of contemporary values. Theatre is about holding the mirror up to nature: the challenge on stage is to play this rational, benign, psychologically sophisticated character in whom we can all see ourselves without losing the spiritual grandeur of the medieval vision.

table for liberalising the tele-communications market, will open its market to full competition from next year.

It is splitting the parent company Swiss PTT into two ceparate businesses. The Postal Service, which employs nearly 40,000 and has reported its first profit since 1945, will remain state-owned, but the profitable telecoms business. Swiss Telecom, which employs about 20,000, will be partially privatised. A full privatisation not envisaged since this would require a change in the country's constitution.

Switzerland, with 4.5m

exchange lines for its 7.3m population, has one of the highest density phone net-works in the world. It is being rapidly digitalised.

The combination of high profit margins on domestic business and Switzerland'a position as the seventh-higgest market in outgoing international telephone calls is expected to attract considerable investor interest, in spite of the crowded agenda for international telecoms issues over the next 18 months.

Swiss Telecom's pre-tax profits nearly doubled between

sales which rose 11 per cent to SFr10.5bn. But the company's 1996 profits, which were released on Friday, fell 48 per cent to SFY746m as a result of a restructuring charge. Cash flow in 1996 was SFr3.9bn.

Bankers involved in the privatisation of Swiss Telecom say it is too early to value the business. Its balance sheet will have to be restructured and its pension obligations sorted out before privatisation. Nevertheless, the company is one of the more efficient international operators and, based on its cash flow, could support a market capitalisation of more than SFr10bn

But the sale to the interna tional investment community will be tempered by the arrival of new competitors in its home

McDonald's franchisees agree to slash burger prices

By Richard Tomkins

US franchisees of McDonald's, the fast food company, have overwhelmingly approved the company's plan to slash prices in an effort to stimulate flagging sales in the intensely competitive burger market,

The sales campaign, which will see the price of a Big Mac cut from \$1.90 to 55 eents, comes in response to slowing market growth and tough competition from Burger King. owned by Grand Metropolitan of the UK, and Wendy's International. It marks en abrupt shift from the company's pre- rants in the US, might vote vious strategy of introducing more high-priced items.

Called "Campaign 65", the promotion will commemorate Mr Ray Kroc's 1955 opening of the first McDonald's in the if their order failed to arrive in every region was well ahead of

the 75 per cent required when in a national programme. There had been speculation that the franchisees, which

serving of fries and a drink the total outlay is only about 5 per cent less than the cost of the same items bought as a combination meal.

The franchisees, which are as worried as McDonald's about the company's loss of market share, appear to have calculated that they have more to gain from increased sales than they will lose from thin-

Mr Jack Greenberg, chairman of McDonald's USA, said: "We are pleased that our owner-operators weighed the facts carefully and came to the same conclusion as we did. This initiative will be good for customers, our franchisees and our

Other fast food operators have said that they will maintain prices at current levels.

Castro courts the capitalists

As smoke from thousands of dollars worth of Havana cigars coiled to the ceiling, a beauting President Fidel Castro resisted the temptation to lecture his wealthy audience about the

evils of capitalism. Mr Castro, in his familiar olive-green military uniform, stood ont from his dinnerjacketed and bejewelled guests. He may have considered that a tirade against capitalism, a favourite theme in his revolutionary repertoire. would not have been appropriate for an audience bidding thousands of dollars for cigar-filled cabinets he had autographed. They fetched up to \$60,000 each.

The guests sitting before him - more than 700 clear distributors, capitalists and bons vivants from around the world

had paid \$500 apiece to attend a cigar-sampling gala dinner at the famous Troplcana Cinb. a relic of pre-Castro Havana nightlife which Cuba's Communist government has shrewdly preserved.

ing capped a week of events to mark the 30th anniversary of the Cohiba, a premium Havana cigar brand created by Mr Castro after the 1959 revolution. More than 100 of the guests

The glittering social gather-

had even travelled to Havana from that neighbouring bastion of capitalism and "imperiallsm", the US, to taste the forbidden fruit of Havana cigars.

In doing so, they were blow ing smoke at the 35-year US economic embargo against Cubs, under which travel by US citizens to the island is restricted. Many of the Americans present - including businessmen, entrepreneurs restaurateurs and hotellers were not keen to be photo-

graphed or interviewed. What a shame, Mr Castro said, that the US trade embargo prevented US president Bill Clinton from enjoying Havana cigars.

Boosted by foreign financing. Cuba's tobacco production is recovering from a recent decline and the island exported a total of 70m cigars in 1996, earning more than \$100m in hard currency.

Masters in Finance

London Business School's Masters in Finance is a specialist programme designed for those pursuing, or planning to pursue, successful careers in finance. It can be completed in nine months of full-time study or in two years on a part-time (mainly evenings) basis.

The Masters in Finance is rigorous, yet practical and career oriented and is taught by the School's internationally renowned finance faculty. It provides participants with an in-depth knowledge of finance and enhances their managerial effectiveness in this field. To find out more, come to one of our information sessions below:

London - Monday 10 March at 6.15 pm Londoo Business School, Sussex Place, NW1 Madrid - Wednesday 12 March at 7.00 pm

Palace Hotel, Plaza de las Cortes, 7 Barcelona - Thursday 13 March at 7.00 pm

Hotel Claris, Pau Claris 150 Athens - Wednesday 19 March at 7.00 pm Athens Hilton, 46 Vassilissis Sofias Aveoue, 11528

New York ~ Tuesday 8 April at 7.00 pm Essex House Hotel, 160 Central Park South Washington DC - Wednesday 9 April at 6.15 pm

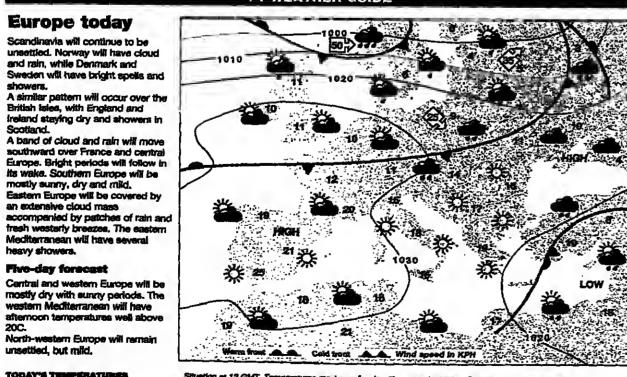

Four Seasons Hotel, 2800 Pennsylvania Ave NW Boston - Thursday 10 April at 6.15 pm Meridien Hotel, 250 Franklin Street

London - Tuesday 22 April at 6.15 pm London Business School, Sussex Place, NW1

Information sessions are held at the School about once a month. Please ask for dates of sessions from May to September 1997. Information about our MBA and Sloan Masters in Management will also be

Dangers in Jerusalem

ast week's decision hy Israel to ecupied Arab east Jerusalem is serious blow to the Oslo peace rocess with the Palestinians, and therefore to the stability of he Middle East. This is not just mother settlement on conuered Arab land. The dispute wer the Holy City goes right to he heart of this century's conlict between Arab and Jew over

The Har Homa settlement, on be bill known to Arahs as labal Abu Ghnelm, differs in me vital respect from the ring of Jewish neighbourhoods mplanted in east Jerusalem after Israel captured it in the 967 Middle East war. It will eal off the last corridor hrough which Arah Jerusalem, laimed by Palestinians as the apital of the independent state which they bope Oslo will leliver, can be linked up to the Nest Bank.

The future of Jerusalem, which Israelis regard as the ternal and indivisible Jewish apital, was to bave been the ast of the intractable issues left by Oslo to "final status" negotiations due to begin on March 17. But hy then, according to a spokesman for Mr Benjamin Netanyahu, the prime minister, he bulldozers will be in Har

The decision is pre-emptive, premature and very dangerous. Three days of ferocious fighting petween Israeli troops and Palestiman police followed Mr Netanyahu's decision last September to open a tourist tunnel near the Moslem holy places in ausly threatened the Oslo pro-

Reaction to this latest move wild bomes for 30,000 Jews in has been uniformly negative from all those with a stake in the region's stability. Israel's closest peace partners. Egypt Jordan and Morocco, are lead ing Arab efforts to seek emergency sessions of the UN Security Council, the Arab League and the Jerusalem Committee of the Organisation of the Islamic

> The EU says Har Homa flouts international law. The US, as chief mediator in the peace pro-cess as well as Israel's closest ally, expressed its dismay at this "further complication of an already complicated situation".

> Mr Yassir Arafat, the Palestinian leader, bas so far enforced restraint on his people. He meets President Bill Clinton Washington today, hoping the US will use its influence to restrain Mr Netanyahu. Since neither the Israeli nor the Palestinian leader can give up the claim to Jerusalem, the best bope is that Israel will find procedural and legal reasons to delay actual construction at Har Homa, and buy time for the

> peace process to take root. If Jerusalem can be pushed back to the end of the negotiating queue, both sides may find there is more room to negotiate than they think.

A recent study by Israel's Gnttman Institute and the University of Maryland suggests that while Jerusalem is a crucial symbol for all Israeli Jews, around balf of them attach little importance to Arab areas outside the Old City. So there may be margin for manoeuvre, but the Old City, This incident seri- only if both sides show restraint, good faith, and above

Bonus fever

The suspension on Friday of a anteed. So the main risk to the National Westminster Bank exeentive for failing to supervise high filers can often find aggressive pricing by an options trader highlights the increasing danger that big bonuses - some of film or more - can pose to those who pay them.

lt is sometimes said that financial stars deserve excepqualal rewards as much as the top laient in sport or show business. But there is an important difference, highlighted in an article today in the Bank of England's Financial Stability Review. Whereas there is no uscentive for a top-flight soccer player to take risks which would damage his team, a financial trader may take risks which could seriously injure his

Whether Mr Nick Leeson, the man who brought Barings Bank to its knees, was primarily motivated by his bonus or by fear of failure, the point remains: high homuses can induce traders to cut regulatory corners as well as to take high risks. Moreover. as the Bruik of England points out, boous incentives can be bighly asymetrical, especially in prosperous times. A trader who lakes a big risk stands to make enormous sums of money. But when his profits are lower. bonoses are seldom negative.

employee is of being fired: another job with ease.

investment banks have thus got themselves into a hind by paying ever larger premiums to prevent key employees, or teams, from defecting. It will not be easy for them to change, as was suggested by Salomon Brothers' loss of many senior employees after it changed its remuneration structure.

However, as the Bank of England suggests, more might be done to make bonuses reflect long term performance, to factor in some measures of the risks taken with the firm's capital and to introduce some uncertainty about payments. This last would allow managers to assess traders for loyalty, teamplaying and prudence as well as more narrowly for their score on a measure of profits. While partnership structures such as that of Goldman Sachs, the US investment banker, may avoid some of the problems, there are doubts as to how appropriate they are in such a highly capital

Intensive industry. High performers must be bighly paid. But there is a strong case now for the City to find incentives to induce its too strikers to behave just a little more like goal-keepers Increasingly, the level is guar-

Jownstairs

More people are rich enough to into the market place. But the afford servants, and more resulting market has some unatpeople are poor enough to be willing to serve.

100

In 1985, 0.4 per cent of total household spending in the UK went on domestic help, the same as in 1968. In the last 10 years, that proportion has more than doubled. Butlers announcing "you rang, m'lud" remain rare. But the army of cleaners, gardeners and child minders serving the prosperous middle theses is growing rapidly.

Half of women with children under 10 go out to work. And the gap between earnings at the top and bottom has widened. In the mid 1970s, the highest paid to per cent earned 2.4 times the lowest paid. That ratio has now tien to 3.5 times. Hard-pressed professionals - whose working hours have increased in recent years - see household service as a way of buying that most preclous of commodities: time.

Fittli the first world war. domestic service accounted for more than 14 per cent of the workforce. Even families of relatively modest means had cooks and housekeepers. The pattern then changed, as the wages of domestic staff increased and technology eased the burden of

Now, household work is mov-

tractive features. It is not transparent, information about wage levels is scarce; jobs and earnings are often insecure, and pay is poor. Tax and social security contributions are widely avoided, which means employees may miss out on benefits.

There is little that government can do in practice to improve the workings of this market. Increased surveillance is unlikely to recover much additional tax. And tax breaks are risky. In France, the cheque de service scheme offers a reduction in employers' social contributions to encourage compliance. But such schemes can seriously distort the market for low-wage labour.

However, the informal arrangements common nowadays are beginning to give way to contracts with agencies. This institutionalisation gets round some of the problems with transparency, security and tax evasion.

Agencies are better able to vet staff for trustworthiness, and they have a professional reputation to keep. They are also more likely to comply with tax laws. As the market for this kind of work becomes more developed, so its wrinkles should gradually ing from unpaid housewives start to be ironed out.

New dawn in the east

Chinese membership of the World Trade Organisation now looks closer, say Guy de Jonquières and Tony Walker

Organisation members meet Chinese negotiators in Geneva this week there will be a buzz of optimism. Efforts to bring the world's most populous country firmly into the global economic community may be set for a breakthrough.

The stakes are potentially vast. deal to admit China to the WTO could open the country's fast-growing economy to mncb freer international competition in the next few years, creating many husiness opportunities for foreign exporters and investors.

Equally important. WTO membership would place China's often unpredictable international trade relations on a more stable footing. Sometimes chided by western critics as an economic rogue etephant, the country would be required to live in a framework of hinding rules and disciplines based on free trade

China applied to the General Agreement on Tariffs and Trade, the WTO's predecessor, a decade ago. Negotiations since then have achieved little, prompting Beijing to threaten more than once to walk away from the bargaining

Now, however, a warming in once-frosty political relations between China and the US bas removed one of the biggest obstacles to progress. After years of being accused by Beijing of stubbornly thwarting its WTO entry. Washington has sought to speed up the negotiations and promised a more flexible approach.

China bas responded by displaying a more businesslike attitude and a readiness to compromise - a big break with its previous belief that It could secure WTO entry by hluff and hluster, as if claiming its birth-

Western officials say the change has transformed the negotiating atmosphere - and prospects for an agreement. "It is clear that China now sees a political window of opportunity to do a deal," says a senior European

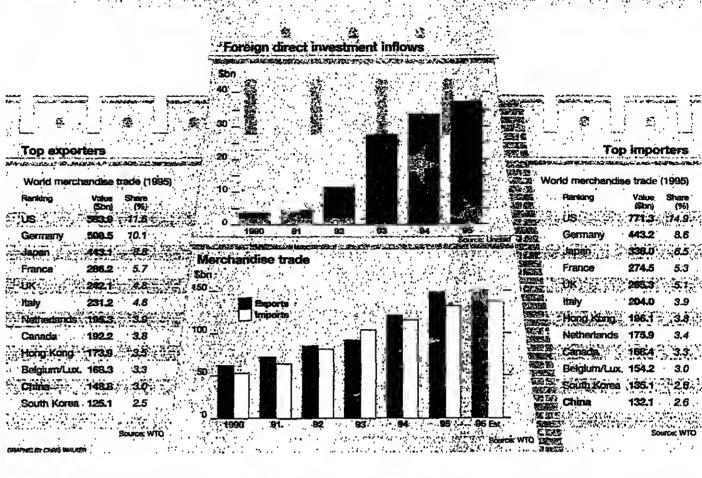

But big hurdles remain. Decisive progress will require Chin to demonstrate a firm commitment to pursuing market-based reforms and opening its economy to the world, after the death last month of Deng Xiaoping, its paramount leader.

Getting a deal will be an important test of US President Bill Clinton's push for closer working ties with China, when many members of Congress are still suspicious of Beiling's intentions and scentical about international trade initiatives.

Western diplomats say Beijing now recognises WTO membership requires detailed agreements on many complex issues. These include the removal of tariffs. quotas, subsidies, investment restrictions and other barriers. and acceptance of core WTO prin-

ciples and disciplines. The level of Chinese understanding has certainly increased, appreciably so," says Ms Charlene Barsbefsky, acting US trade representative.

Establishing a firm timetable for China's WTO entry is being seen as the desired headline achievement of a summit between Presidents Clinton and Jiang Zemin, tentatively planned

results by then will require a formidable negotiating effort.

Some western officials have been encouraged by recent indlcations that China is preparing to hudge on some issues, but are still waiting for it to turn these hints into firm offers. "The rhetoric has improved, but it's what's on paper that counts," says Ms Barshefsky.

China, she says, seems willing to move only on isolated issues, when a more comprehensive China has hinted at further tariff cuts. Ms Barshefsky says these to imports are removed. Western negotiators say

Beijing's liberalisation proposals are also often imprecise. "It is not clear they are yet fully prepared for the decisions on what they have to do," says a senior Eli official.

China's ability to respond swiftly to these concerns is limned by several constraints, which can only be made more difficult hy political manoeuvring in Beijing following Deng's death.

China's negotiators are neryous about being rejected by the WTO again, after the country's failure to join the body as a founding member two years ago. "They are under huge pressure at every level to avoid a rehuff," says a European ambassador to

Bui China faces a hard task squaring WTO entry terms with powerful domestic interests which are deeply suspicious of memhership. They include the state-owned enterprise lobby and state trading companies which stano to lose lucrative monopo-

A US official says the "bottom sitional periods, the happier we line" for state companies is the

market by fiercer international competition. The state enterprise lobby plays on concerns among the leadership by warning that WTO entry will increase unemployment in urban areas, where state companies provide many

While Chinese leaders may be dedicated to long-term economic liberalisation, the heads of enterprises, functional ministries and trading corporations want to go slow. That means that, as China's approach is required. Although negotiators bargain in Geneva, lobby, whose support is widely suggested the exercise was parallel negotiations are lumbering on in its national hureau- initiatives this year.

> hat makes for difficult WTO talks on reducing the elaborate subsidies on which China's economy rests. Although often bard to identify. the subsidies are widely blamed hy China's trade partners for distorting markets and discriminaling against competition. Big agricultural exporters, such as the US. Australia and Canada. say subsidies are a particular problem in the farm sector.

> Another sticking point is services. Vested interests oppose a significant opening of this sector particularly hanking - to foreign competition, saying that Chinese institutions need longer 10 become competitive.

The US, the European Union and Japan accept that China needs time to reform its trade regime after WTO entry. However, there is no agreement on bow long it should he given to adjust, and in what sectors.

"That is really the guts of lt." says one western official in Beiitng. "The closer to five-year tran-

will be. But for the Chinese, the

Securing acceptable terms and ensuring that they can be effectively monitored and enforced once China joins the WTO - poses a sensitive political challenge for many western governments, above all the US.

US manufacturers with interests in China are pressing bard for a deal on WTO membership. But an agreement would also kets enough to satisfy the farm seen as essential to any US trade

hard to prevent China's WTO hld from being entangled in a looming power struggle with Congress over who runs trade policy.

Influential members of both parties, disenchanted with many past trade deals, such as the North American Free Trade Agreement, are pressing to give Congress a bigger say in future ones. Some want the right to approve any WTO agreement with China line-by-line - a process which could lead to delays or even rejection.

These concerns may also make long-standing requirement that negotiations over tariffs. quotas Congress renew annually China's and subsidies. most favoured nation trade status, which guarantees its export-

ers access to the US market. Under WTO rules the US ought to grant China permanent MFN status as soon as it joins the organisation. Some officials in Washington would like the US to make such a move before then. saving that it would increase China's incentive to negotiate

constructively. Many in Congress are resisting such a move. They insist that China must first show that it bas

for later this year. Delivering fear of being driven out of the closer to 15 years, the bandled the bandover of Hong results by then will require a for market by fiercer international more satisfied they will be." Kong responsibly and take action to reduce its growing trade surplus with the US, which reached \$10bn last year.

In the past month a further political uncertainty has emerged, in the form of allegations that China's embassy in Washington co-ordinated contributions to President Clinton's re-election campaign.

Although the allegations are need to open agricultural mar- still unproven some conservative American critics of Beijing have intended to manipulate Washington's attitude to China's WTO

"The Chinese embassy involvement could blow up in President Clinton's face," says Mr Nicholas Lardy, a China scholar at the Brookings Institution in Washington. "It puts him in an awkward position domestically, even if It is shown that China was not trying lo influence policy, hut simply to get better intelligence about it."

These mounting challenges in Washington, with the uncertaintles in Beijing after Deng's death, mean that the success of China's WTO application is likely to harder to remove the hinge on more than detailed

Some observers are warning that without clear political lead ership, China's membership risks being suhmerged by political infighting over largely unrelated issues in both capitals.

Mr Robert Kapp, head of the US-China Business Council, a US industry lobby group says: "If that happens, it may not then matter that a good agreement bas been reached on the substance of China's WTO accession. hecause the window of opportunity will bave been lost."

New broom for Brussels

A new British broom is about to sweep through the European Parliament, Julian Priestley, who took over as secretary general this weekend, is the youngest ever occupant of an increasingly important administrative post.

But the 46-year-old Priestley is a veteran parliamentarian. A former president of the Oxford Union and Young European Pederalist, he arrived in Brussels in 1973 – when the Parliament was still known as the European Assembly - and has spent his whole career in the institution. He found time, though, to contest three general elections as a Labour candidate in his native Plymouth; on the last occasion, in 1983, he lost to former British foreign secretary David (now Lord) Owen.

Priestley's first job will be to inject professionalism into the parliament's unwieldy secretariat. The administrative patronage; its split domicile between Brussels and inefficiency. Reforms are

side has long been riddled with Luxembourg is an invitation to essential if the institution is not to grind to a halt following the

five generations of the family

Rings a bell ■ Kicking off his maiden

eight-day tour of south-east Asia in Manila this weekend. South African President Nelson Mandela livened things up by appearing with his sweetheart Gracha Machel, the first time she has accompanied him on a state visit.

Mandela, who divorced second wife Winnie last year, usually travels with his daughter Zenani or granddaughter Rochelle. Amid a 21-gun salute and full military bonours Machel - the 51-year-old widow of Somora Machel, the former president of Mozamhique - was presented to President Fidel Ramos as

Mandela's "companion". After signing a series of trade agreements Mandela leaves Manila today for Brunei; but the local press was more interested In his personal life than in the dull old husiness of trade. So does the president have any wedding plans?

With the poise of a true statesman, Mandela deftly sidestepped the personal question. "My cultural background does not permit me to discuss this question with

children or grandchildren.

■ In a speech two weeks ago Federal Reserve chairman Alan Greenspan asked whether the Commodity Futures Trading Commission, one of Washington's smaller regulators. was really necessary; be has also put his weight behind a bill being drafted in the Senate that would curtail the agency's activities.

After a week collecting her thoughts, CTFC chairwoman Brooksley Born has responded with gusto. She said Greenspan's comments didn't surprise her. "He is a central banker who has long been dedicated to free markets and deregulation. His philosophy is one of capeat emptor, let the buyer beware." She added: "This country bas been dedicated to something other than caveat emptor for the

last 70 years." But It will take more than sharp words and appeals to history for Born to turn back the tide of deregulation which threatens her agency; the Fed, the US Treasury, the investment banking community, and most of the futures industry are lined up in favour.

Financial Times

100 years ago Her Majesty's Jubilee

It seems that the celebration of the Diamond Jubilee (of Queen Victoria] is not the only event of the kind that will make the present year illustrious in the history of Great Britain. The Directors of Prire's Patent Candle Company inform their shareholders in their report for 1896 that this concern commenced its corporate existence in May, 1847, so that its fiftieth year "corresponds auspiciously with the year in which the Queen's subjects throughout the civilised world are about to celebrate the completion of sixty years of Her Majesty's benefirent reign." This additional excuse for illumination should make the report for 1897 pleasanl reading.

50 years ago

Malay Rubber Agitation Singapore, 2nd March. The Malayan Union Government is taking firm action to deal with the situation in the planting districts of Central Kedah, where intimidation of labour forces by a militant youth corps organised by so-called labour leaders is held to be responsible for riots and disturbances.

Castro courts the capitalists

By Pascal Fletcher in Havana

As smoke from thousands of tributors, capitalists and bons coiled to the ceiling, a beaming President Fidel Castro resisted the temptation to lecture his wealthy audience about the evils of capitalism.

Mr Castro, in his familiar olive-green military uniform, stood out from his dinnerjacketed and bejewelled guests. He may have considered that a tirade against capitalism, a favourite theme in his revolutionary repertoire. would not have been appropriate for an audience bidding thousands of dollars for cigarfilled cabinets he had autographed. They fetched up to \$60,000 each.

THE LEX COLUMN

Defusing the bonus

how bonus structures can skew traders' appetites for risk could hardly be better timed, given Nat-West's recent problems with a way-ward options trader. The Bank correctly points out that a typical bonus structure - in which a trad-er's remuneration rises with the profits he generates - is like a call option. As revenue goes up, so does his bonus; but if there are big losses, the most he loses is his job. Paradoxically, the common practice of dismissing traders when they lose money can also increase risks. A trader in the relegation zone may have everything to gain and nothing to lose by raising the stakes.

The defects of all-or-nothing bonuses, where an award is made only when a specific target is hit. are perhaps even greater. A trader just shy of the target has an incentive to take huge risks. Equally, once the target has been met, the trader could be excessively risk-

The best way of avoiding one-way bets is to pay traders deferred bonuses - allowing banks to claw back awards made in previous years if there are losses. The Bank points out that this is unpopular with employees. But that is hardly a reason to stick with the wrong bonus structure. Employers should be prepared to make compensating adjustments to other elements of their traders' package as a quid pro quo. And those traders who still do not like it should be regarded as high risks and shown the door.

BA/American

Befuddled or bored by the tortuous progress of British Airways' and American Airlines' planned alliance? By now, most investors are both. But through a fog of propaganda and regulatory double-talk, it is important to keep an eye on the essentials of the process.

Start with the regulators. Now the UK authorities have said their bit, the alliance needs approval in the US. With American's competitors squawking loudly, this will be slow and difficult. But the underlying fact remains: the UK is dangling a succulent carrot - opening London's Heathrow sirport - which the US badly wants. Yes, more Heathrow slots will probably have to be offered. Yes, some US destinations may be excluded. But in the end, the chances of the US killing the plan look slim.

reasons not to fret. Assuming BA/ AA have to offer more elots to please US regulators that should also help appease Mr Karel Van Miert, the competition commissioner. But even if not, he cannot block the deal; he can merely sak the Commission to refer it to the European Court. The Court would then have to find that the UK's decision contravened the deeply fuzzy Treaty of Rome. And even if it did? Most likely, BA/AA would just

have to give up yet more slots. Shedding further slots matters only if they have to be given away for less than they are worth. Unfortunately, this is exactly what Mr Van Miert claims European law requires. And hopes of legalising the present under-the-counter slotselling in time to help BA/AA now. look forlorn. So do BA/AA simply go sheed and sell, risking a court challenge from the Commission? Probably. But the risk of a successful challenge cannot altogether be

ruled out. How much would that matter? Between them, BA/AA are being asked to shed slots worth £150m-£200m (\$243m-\$324m, based on the last public trade in Heathrow slots), or £300m (based on BA's average Heathrow profitability). Is it worth it? The alliance's finances are tricky to gauge since the airlines have said little on the subject. Nevertheless, the analysis can go beyond simply reckoning on a bigger vari-

competition is bound to do to when properties can addit be prices. But this should be far out-acquired; at below their weighed by the revenue gains from tion cost Granada's interities chabit plugging together BA/AA's transat is an obvious candidate/futblinter be chances of the US killing the lantic services with American's Continental Hotels World probably domestic network and BA's European ComWhat then of the European Comwhat then of the European Com-

of airline economics; in a low-mar-gin, highly-geared business burns on sests count more than anything. But in an alliance of this depth costs cannot be forgotten. Costs attributed to BA North Atlantic services are roughly £1.7bm a year. Even if just 5 per cent can be cut, operating profits from these services would be lifted by 35 per cent. To arrive at a net increase in BA's overall pre-tax profits of £150m-£200m a year from such essumptions - roughly 30 per cent - is surprisingly straightforward. Yet little credit for this potential is given in the company's share price, which still stands at a 20 per cent discount to the market average prospective price/earnings multiple. Peer through the regulatory forest, and the shares look cheep.

Hotels

Hotels have become the latest hothed of mergers and acquisitions activity. Hotel companies are generating substantial cashflow after years of recession at the same time as the industry has picked up the mantra of consolidation. And the number of deals, and prices paid, is rising fast. Hilton Hotels set the ball rolling with its \$6.5bn offer for ITT and its Sheraton brand. Now, the competition is werried about getting left behind. Marriott paid \$1bn for the Renaissance Hotel group, a deal which may not enhance carnings until 2000. Hyatt has announced plans to invest \$1bm over the next three years, and Four asons is chasing Louthe's Princess Hotels resort chain.

The Renaissance deal suggests the market is getting a little frothy, but the logic for consolidation is compelling. The aim is to have an unmatched booking network, with consistent quality of health around the globe. Economies of scale pro-vide a more competitive cost base. But more importantly, a global presence makes loyalty programmes more sequelity, and gives clost for regotiating with minimational corporate clientensis.

More US bits are likely particularly at the food star end of the

ant of BA's old alliance with USAir. market, But the next wave could be.

The equation has three main international deals as ESC compaparts. First is the damage that more mes buy ground reach at a time.

Masters in Finance

London Business School's Masters in Finance is a specialist programme designed of those pursuing, or planning to pursue, successful careers in finance. It can be completed in nine months of full-time study or in two years on a part-time (mainly evenings) basi

The Masters in Finance is rigorous, yet practical and career of teach and career the School's internationally renowned finance faculty. It provides participants of in-depth knowledge of finance and enhances their managerial effectiveness in this To find out more, come to one of our information sessions below:
